P R E F A C E.

WHILE conversing one evening, on board Her Majesty's ship Cyclops, with the Hon. Captain Hastings, he remarked that great benefit might accrue from the visit of a naval officer to the King of Dahomey, at a time when the death of that king's chief agent and principal merchant, Da Souza, left him more at liberty to exercise his humanity, and to listen to the oft-repeated appeal to suppress the slave trade in his dominions. Having long had a desire to visit the interior kingdoms of Africa, and to witness the effects of the slave trade in the countries of its sources, I instantly volunteered my services. But Captain Hastings, although senior officer and himself the proposer, did not feel justified in despatching me without the permission of

the Commander-in-chief, whose pendant he was about to join.

The Commander-in-chief received the offer of my services, and at the same time a request from Mr. Duncan, the newly appointed Vice-Consul, that a naval officer should accompany him to the Court of Dahomey, and was pleased to confer on me the honour of the mission.

A great deal has been written on the state of the slave trade on the coast and at sea, together with the fate of the slaves in the Brazils. It is the object of the author, in giving publicity to the following Journals, to illustrate the dreadful slave hunts and ravages, the annihilations and exterminations, consequent on this trade ; and to bring prominently before the British public the sacred service they are rendering their fellow-men, in prosecuting their increasing efforts to allay those fearful horrors.

I had been often a day or two journeying into various parts of the interior of Africa,

and had seen the state of the slave trade in its advanced systematic stage, and had considered the horrors of that division of it disgusting enough. I have visited baracoons, and seen men so fearfully attenuated, from want and over-exercise in the march to the coast, as to render nature unable to support the frame. I have seen the hold of a slave ship, and the horrors consequent on diseases arising from the crowded state and want of wholesome food to alleviate the cravings of hunger and thirst. I have seen the slave toiling in South America, and known that the labour of these was a matter of calculation to the master, whether, by continual toil and short life, he would gain more money than by light work and protracted miserable existence. But what are all these to the tragic scenes that introduce the slaves to slavery ? A country living in peace with all around, and pursuing trade in the endeavour to become rich, is suddenly surrounded by

a ruthless banditti ; and how changed the scene ! The old would be rejected if brought to market, they are sacrificed ; the whole nation are transported, exterminated, their name to be forgotten, except in the annual festival of their conquerors, when sycophants call the names of vanquished countries to the remembrance of the victors.

This state of society will last as long as the slave trade exists. The question that should be asked is : Is it in the power of this country to stop it ? I will not confine myself to opinions, but relate facts.

For six months in the year 1848, between the colony of Sierra Leone and Liberia, in Her Majesty's ship Bonetta, under my command, I captured six slavers. There were then four cruisers on that station, and two of which captured each two, and the third one slave ship, in the same space of time. This proved that the state of the slave trade there must at that time have been very brisk. Diogenes, in his search for an

honest man, had a better chance of success than a cruiser has of a slaver there now. The trade is destroyed, and the people have receded from their evil habits and become industrious. This portion completes a long line of coast now open only to legal trade; and, if joined by the part of which these Journals treat, would embrace the whole of the continent of Africa, to the northward of the line. It is only a portion of the coast to the southward that requires blockading now; and the effect of the squadron at present employed, if the trade in the Bights could be checked, would be four-fold on that portion of coast to be guarded. Let the government fit out a decked boat for each cruiser; let her be a fast sailer, manned, rigged, and in every way armed and equipped by the cruisers, and the effect of the squadron is again double.* Many

* This opinion was written before the author had had an opportunity of hearing the purport of Captain Dunlop's evidence before a committee of the House of Lords.

of the cruisers could well equip and man two of these launches, and so line the coast that no ingress or egress could take place unknown.

I do not blame those who think the squadron increases the horrors. It is a natural conclusion, and one I myself arrived at, until I had witnessed the true source of the evils complained of. Then I saw that if the squadron were withdrawn, the slave hunts and exterminations would be increased. The inhabitants of a vast extent of coast have been led to give up the slave trade, and why? because they have been taught the immense increase of the value of the palm-oil trade over that in slaves. In all the countries which have given up the traffic in their fellow-men, the preaching of the Gospel and the spread of education have most materially assisted the effects of the coercive measures of our squadron. There are kings in the Cameroons and Bonny rivers, whose ledgers, kept

by themselves, would grace any counting-house in this country ; and whose minds, expanded by education, have made them bold enough to declare that the old superstition of the Eboe should no longer exist, setting the example of becoming Christians. When the slave trade is checked, other trade should be substituted, or it will soon revive. To insure success, education should be first planted, and then trade introduced : thus, becoming enlightened, the African would sicken at the horrors he has hitherto encouraged.

Dr. Johnson said it was possible, though not probable, that amazons had existed. The amazons spoken of in these Journals are not deprived, like the ancient female warriors, of their left breast, but are perfect women. They live in chastity, nominally as wives of the king's old soldiers; or, for distinction in bravery, are given in marriage by the king to his favoured subjects.

In a barbarous country like Dahomey, it

is curious to find that the dynasty has lasted two centuries. Many of their customs are strangely at variance with the horrors of others. The forms and ceremonies of polite society contrast oddly with the sacrifices of their unoffending prisoners of war. The faithfulness of memory displayed by the troubadours and the high officers proves the Dahomans to be capable of receiving education. Let it be hoped that before long this nation may be added to the many in Africa that prefer the labour to the sacrifice and sale of the subject: the former in the vain attempt to propitiate an offended all-powerful, Being; the latter to enrich, at the expense of their own, a foreign and distant, and, alas! Christian, land.

DAHOMEY AND THE DAHOMANS.

INTRODUCTION.

CHAPTER I.

DAHOMEY AND ITS NEIGHBOURS.

As the king of the slave trade and its merchants, the Dahoman monarch has become a word of common use ; whilst the position of his kingdom, and the habits, manners, and customs of his people, equally with the resources of its sovereign, are incorrectly, if at all, known. Lying inland on the Guinea coast, this great military kingdom extends almost from the banks of the Niger to those of the Volta, and domineers

over, if it does not possess, the entire land that lies between the coast thus cut off between the mouths of these rivers and the bases of the Kong Mountains. Until after the commencement of the last century, the very name of Dahomey was unknown in Europe, and the earliest account that we possess of its people and their power does not date back beyond that era.

*Early maps
of Daho-
mey.*

There have been some geographers who have persuaded themselves, that in the Dauna of Leo Africanus was to be recognised the Dahomey of our own day. But though the Venetian map of Sanutus as early as 1588 placed that name with apparent certainty, and was followed by Dr. Hailey in his edition of Sir Jonas Moore's Mathematics nearly a century afterwards, we now know for certain that the kingdom thus marked on their maps is occupied by nations differing in name, in race, and in manners, from the Dahoman people. The earliest intercourse between the Dahomans and Europeans, as at present known, dates from the year 1724, when the then king of

Dahomey overrun the kingdom of Ardrah, that lay between his capital and the sea-coast, and seized in its chief town a European captive, and agent for the English African Company, Mr. Bulfinch Lamb, though carried captive to Abomey, was well and kindly treated by the dark monarch, and so far allowed his liberty, as to be permitted to correspond with his superior, the commandant of the English fort at Whydah. It is in a letter from Mr. Lamb to the English commandant that we obtain the earliest sketch of this little known people; and so curious is this early description, and yet so truthful to the present habits and manners of the people, that it has been deemed advisable to reprint it in the Appendix. It is more than curious to note how little this military despotism has changed in two centuries and a half, notwithstanding all the progress that has been made on the African coast by European enterprise and intelligence.*

* Letter from Mr. Bulfinch Lamb to Mr. Tucker,

Early history of Dahomey.

The narrative commenced by Mr. Lamb is carried on in separate works by Captains Smith and Snelgrave until the time when the imprudence of the English commandant at Whydah brought on a second and third invasion of the coast countries by the king, and ended in the death of the governor, and the temporary destruction of the Dutch, English, French, and Portuguese forts at the town of Jaquin. This was in 1732, the year in which the king, called generally Guadja Trudo, died, and was succeeded by his son, Bossa Ahadee. Of this miserable tyrant, the history was written by one who had been engaged for eighteen years in the African trade, and completed in the more perfect work of Governor Dalziel, the governor of Cape Coast Castle. The latter work, besides including and continuing Mr. Norris's ac-

governor of the English fort at Whydah, at the end of "New Voyage to Guinea," by William Smith, Esq. London, 1745. Full Account of some Part of Guinea, by Captain William Snelgrave. London, 1734. See Appendix (A).

DAHOMEY AND ITS NEIGHBOURS.

count of Ahadee's reign, carried down the Dahoman annals to the time of the son and grandson of that detestable savage.* From this period the history was briefly sketched by Dr. M'Leod, and continued to the reign of the younger son of Weenohoo, the grandson of Ahadee, who had succeeded to the throne in preference to his elder brother, whose deformity in one foot was deemed a sufficient, or at least was set up as the, reason for his being rejected as his father's successor to the throne. Thus has the history of this important and deeply interesting nation been brought down to the commencement of the present century, when it is found under a new sovereign, but unchanged in manners and habits, though greatly enlarged in its power

* Memoirs of the Reign of Bossa Ahadee ; with an Account of a Journey to Abomey in 1772, by Mr. Robert Norris. London, 1789. History of Dahomey, compiled from authentic sources, by Archibald Dalziel, Esq., Governor of Cape Coast Castle. 4to. London, 1793. A Voyage to Africa ; with some Account of the Manners and Customs of the Dahomian People, by John M'Leod, M.D. London, 1820.

and its territories, and in daily intercourse with, and even dependant on, Europeans, for its prosperity and its revenues. The rise of the military kingdom of Dahomey dates from the commencement of the seventeenth century. At that period, when Tah-coo-doo-noo, chief of Fohee, captured the present capital, the united provinces of Dahomey and Fohee formed a kingdom scarcely more extensive than the county of Rutland. From this central state, lying equidistant from the banks of the Volta and the Niger, has extended the now military and most powerful monarchy in Western Africa. On every side, conquest has increased its territories, as each successive annual slave-hunt has annexed some one or other of the neighbouring states, which it depopulated in its merciless progress. Had it not been for this system of depopulation, the conquering nation could with difficulty have governed the extensive territories which each annual slave-hunt added to their kingdom. Revenue from the sale of prisoners is the primary object of these

DAHOMEY AND ITS NEIGHBOURS.

expeditions, and the addition of wasted countries the necessary, but far from coveted, consequence.

Although, for two centuries at least, Dahomey has been a military nation, it was not until the usurpation of the present monarch, consequent on the unmilitary character of his deposed brother, that she rose to her present height, as the dreaded oppressor of neighbouring nations. Indeed, in the reigns of the later monarchs, the border states of Eyeo, Anagoo, and Mahee often defied the Dahomans with success; but now, should a neighbouring people become rich, it is regarded as sufficient insult to call forth an immediate declaration of war from the court of Dahomey. Thus is it that, on the northern and north-eastern borders, the Eyeos and the Anagoos have been almost entirely subjugated, and the country overrun to the foot of that natural and impassable boundary offered by the lofty summits of the Kong Mountains. On the western and north-western side, the stream of the Volta alone sepa-

Dahoman conquests.

rates Dahomey from its great rival monarchy of Western Africa, the kingdom of Ashantee. Time alone can develope the consequences to Africa of such powerful and ambitious nations being divided by no more difficult boundary than the far from wide or impassable waters of the Volta. Already on that side the Attahpahms and Ahjabee have been defeated although not annexed to the rapidly increasing territory of Dahomey.

Abeah-
Keutah,
Lagos, and
Benin.

If we turn to the East, we find the extensive provinces of Yorihbah looked upon with cupidity, and marked out for devastation, slavery, and murder; whilst already the populous city of Abeah-Keutah, the abiding place of many hundreds of Christians, and the seat of missionary enterprise in the Bight of Benin, is marked out as the scene of the approaching slave-hunt. The fall of this noble and nearly Christian city demands our deepest attention. Standing on a river, which reaches the sea at Lagos, through the Lagoons, it would, were Lagos open to legal trade, soon become

the central emporium of commerce from Yorihbah, Bornou, and all the other countries neighbouring on the banks of the Niger. Lagos itself is a most important position as a trading port from its connection with all the countries of Guinea. It is at present notorious as one of the greatest slave depôts in Africa, and for many reasons likely to remain so. The king of Lagos was a slave himself, and, as an usurper, is entirely in the hands of his patrons, the slave merchants who placed him on the throne. On the west side the Lagoons may be said to join the Volta, although in the dry season, at a little distance from the town of Godomey (fifteen miles from Whydah), a sandy neck divides the Lagoons of Lagos and Whydah. Emptying into these Lagoons are several navigable rivers, as yet but imperfectly known, except to slave enterprise; whilst, on the east, the Joh creeks, navigated by a water population, called the Joh pirates, connect Lagos with the Benin, and the whole delta of the Niger. The importance of putting a stop

to the slave trade in Lagos cannot be exaggerated. A fort on the present position occupied by the slave barracoons, would prevent any transportation from the many slave nations in the interior of Benin, the king of which place now partially supplies the Lagos trade, assisted by the Joh men. On this question, together with family jealousies, Benin is divided into two separate states, Benin and Warree; and is likely, from the increase of legal trade in the Benin rivers and the quarrels of the royal family, to be yet again divided. It is long since the royal family of Benin, becoming too numerous and burthensome to the state, first divided; and one portion, crossing the river, settled at Warree, dependent and tributary to the parent state. When the Portuguese settled in the river, great inconveniences were felt by duties being levied by both governments. At their instance the Warree family threw off the yoke, and declared that state independent of Benin, and masters of the river and trade, which she now holds. The Warree

family becoming numerous, one of the younger branches founded a city on the Jackwaw creek (connecting Lagos and the Benin river); and the king of Warree having died, and his throne being disputed, the Jackwaw people, under their chief, Jibuffu, held neutral, and will, if they have not already, declare themselves independent of the new sovereign of Warree.

Notwithstanding the Benin river is ostensibly open to legal trade, it is also traded through by the slave-merchants of Lagos. Should an attack be contemplated on Lagos, small steamers might enter the Benin river and reach Lagos by the Joh creeks.

To return to Dahomey. The only slave port actually belonging to the kingdom is Whydah : but the king claims the beach and the right of embarkation, and enforces tribute from the European traders at the ports of Porto Novo and Badagry on the east, and the Popoes on the west. Several small nations have been conquered in opening a road from the interior kingdom of Dahomey to the sea, the chief of which

was Ardrah, whose capital Allahdah still remains. It is difficult, if not impossible, to decide what is the actual extent of the kingdom of Dahomey. It may, however, with safety be taken at about 180 miles from east to west, and nearly 200 from the sea coast at Whydah to its most northward boundary. Throughout its territories the population is far from sufficient for an advantageous occupation of more than one third of the lands; utterly insufficient, therefore, for the full development of the many sources of wealth which the rich soil and mineral resources of the country afford.

CHAP. II.

THE DAHOMANS AND THEIR MANNERS.

Most travellers are forcibly struck with the rapid improvement in morality, which, in barbarous equally with civilised countries, characterises the interior of a country as compared with its seaports. In the latter and their nomadic inhabitants immorality seems innate, and the habits of seafaring men of all nations and classes in the main tend to demoralise the society into which for a time chance throws them. They are birds of passage and of pleasure, and are content to seek the full of that licence which their temporary resting place affords. In Africa this is most patent; and idolatrous though they be, and barbarous in the extreme, the people of the interior are generally far more moral than the semi-civilised and nominally Christianised inhabitants of the sea coasts. At Whydah,

and every cunning, secrecy, and ingenuity is exercised to take the enemy by surprise. Thus at Okeadon, in 1848, one chief turned traitor, and introduced the Dahomans at daylight. They had made a feint on Abeah-Keutah, and in the night fell back upon Okeadon. On the opposite side to that attacked, ran a rapid river, and in crossing this many were drowned, and but few saved. Although there was no resistance, all the aged were decapitated on the spot, to the amount of thousands, and the strength and youth of the city sold into slavery.

The attack
on the
Attah-
pahms.

The Attahpahms, in the early part of 1840, aware of the Dahoman march, sent every article from their town with all the aged, youths, and females. Unfortunately, the preparations of the Dahomans struck terror into the minds of the soldiers of the Attahpahms, who, knowing their fate, if conquered, excepting about 400, fled from the city. Yet these 400 resolute men kept the Dahomans in check, killed many, put the males to the rout, and had it not been for a rally of the amazons, would

have discomfited the Dahoman army. Had the Attahpams stood, they would, with ease, have conquered the merciless invaders.

After the destruction of a town, notice is sent to all neighbouring cabooceers, or chiefs, calling upon them to swear allegiance to the conqueror. Many do so at once, and receive their original rank, with an equal, a Dahoman, to act as coadjutor: the remainder are persecuted until subjugated.

On the return from war in January, the king resides at Cannah, and what is termed "makes a Fetish," *i. e.* sacrifices largely and gives liberal presents to the Fetish people, and, at the same time, purchases the prisoners and heads from his soldiers: the slaves are then sold to the slave merchants, and their blood-money wasted in the ensuing Custom, Hwae-nooeewha, as the great annual feast is entitled in Dahoman parlance.

The annual
Customs.

Of these Customs, the most important is that held in March, and called the See-que-ah-hee, at which the king's wealth is

profusely displayed, and of which one of the following Journals affords the first description ever given to the world. That which is held in May and June, is in honour of Trade, with music, dancing, and singing. A small schooner on wheels, laden with gifts, is then drawn round the capital, and the cargo afterwards scrambled for by the Dahoman army.

The royal
salute.

In July, on an appointed day, the soldiers are planted along the road from Abomey to the beach at Whydah, a distance of ninety miles. At the moment when the king drinks, its announcement, by the first gun of a royal salute fired at Abomey, is carried by the musketry to Allahdah, whence the first of a salute there is conveyed similarly by sound to the beach at Whydah, intended as a salute to the Fetish of the Great Waters, or God of Foreign Trade. The boom of the first gun fired by the foreign forts at Whydah is echoed back through Allahdah to Abomey, whence another salute finishes this extraordinary Custom. August and September are oc-

cupied by preparations for war, serving out powder, balls, or gun-stones (small ironstones), and much palavar on war subjects. Before going to war the king makes a Custom to the memory of his father, which generally lasts a month ; and thus ends the year, keeping the nation in a fever of excitement, dancing, singing, haranguing, firing, and cutting off heads ; thus demoralising more and more the natures of a people already among the most barbarous of the African nations.

Strange and contradictory as it may sound, this great nation is no nation, but a banditti, and there are few pure Dahomans. Those who may claim to be of the race, are the king's family and the nobles ; but even these are not of pure descent, as the harems of all are replenished with the fruits of war. As a military nation, the officers are natives, the soldiery foreigners, prisoners of war, or purchased slaves. To the eastward of Abo-mey, all is waste to the Ahjahee country, still unconquered, but threatened and already asked far once, the cause of offence

The origin
of the
Dahomans.

being, that they harboured the Attahpams. In the Attahpam, or north-east direction, Dahomey has no territory. To the west, Katoo is a possession, not by conquest, but conciliation. The people wished and the king agreed to war; but the Fetish people declared that, if war was made on Katoo, the king would be killed: the king sent large presents to the chiefs, and Katoo voluntarily submitted.

On the north, the Anagoo provinces are partly wastes, but still inhabited. On the north-west, the Eyeos and Mahees are still large nations under the Dahoman yoke. South, several nations have been subjugated, to open the road from the capital to the Port of Whydah. Porto Novo belongs to its own king of that ilk, and Badagry is under the rule of a native chief: yet the king of Dahomey claims the beach of both those places, and has made warlike excursions as far as the latter.

War is annual, or rather an annual slave-hunt is undertaken, to furnish funds for the royal exchequer. The king professes never

to make war on any country that has not insulted him, or until asked for by his people thrice, the mystic number. Okeadon is an exception. The cause of complaint against Abeah-Keutah now is, that, in the Okeadon war, they made a sally and took an amazon regiment, general; and umbrella. Greigwee or Whydah was taken, nominally, for selling muskets to the Dahomans, without locks, but, in reality, because they required a port for foreign trade. Eyeo, Attahpahm, Yorihbah, Anago, and Mahee, all more or less subjugated, made war upon Dahomey.

Industry and agriculture, are not encouraged. On the contrary, the king is aware, that, if the enjoyments of home, and the luxuries of health and domestic happiness, were once obtained, he would fail in volunteers for the annual slave-hunts. The road to riches hitherto has laid in the number of retainers the noble or chief could send to war. They are fed and partly clothed, but receive no pay, except at the scramble at the Customs.

The slave
hunts.

Prisoners and heads are purchased from them, and, according to their bearing in war, the officers are the recipients of the royal bounty.

The king animates his chiefs, and creates emulation even between the highest. Thus, the miegan and the mayo will be called to the sacrifice of a bullock to their people. The mayo claims the head, the miegan demands it by right of position ; the mayo boasts that he provides more soldiers, who do more execution in war ; and the king allows him to retain it. If a soldier act as a coward, or, which is considered tantamount, does not either take prisoner or head, the king will offer him a present at the Customs ; those who have acted well accuse him, and, if their accusation is proved, claim the present, while this charge thus substantiated, is acted upon at once.

The miegan
and the
mayo.

The actual first man in the kingdom is the miegan, who is the chief executioner ; the second, the mayo or grand vizier : there is a female miegan and a mayo, who have corresponding duties in the harem.

SEH-DONG-HONG-BEH.
AN AMAZON IN THE DAHOMEAN ARMY.

LONDON: LUNDEN & CO. 1851

Under the monarch, each rank has four equivalents: thus the miegan and the mayo hold a balance of power; their coadjutors in the harem are also equal to them in rank. The people are divided into two parties,—the miegan's and the mayo's, the right and the left. In war, the miegan's soldiers are joined by the miegan's amazons, and thus form the right or advanced battalion.

The amazons are not supposed to marry, The amazons. and, by their own statement, they have changed their sex. "We are men," say they, "not women." All dress alike, diet alike, and male and female emulate each other: what the males do, the amazons will endeavour to surpass. They all take great care of their arms, polish the barrels, and, except when on duty, keep them in covers. There is no duty at the palace, except when the king is in public, and then a guard of amazons protect the royal person, and, on review, he is guarded by the males; but outside the palace is always a strong detachment of males ready for

service. The amazons are in barracks within the palace enclosure; and under the care of the eunuchs and the camboodee or treasurer. In every action (with males and females), there is some reference to cutting off heads. In their dances—and it is the duty of the soldier and the amazon to be a proficient dancer—with eyes dilated, the right hand is working in a sawlike manner for some time, as if in the act of cutting round the neck, when both hands are used, and a twist is supposed to finish the bloody deed.

Customs at court.

In the royal presence no rank is free from prostration, and the throwing dirt on the head, except white men, and a certain class of necromancers, who regulate sacrifices to divert epidemics, and other evils: these people wear hats, and only bow to the throne. The liberated Africans and returned slaves are considered as white men; and while the king's ministers are prostrate in the dust they merely bow. In the royal presence none may smoke but white men; and in the precincts of

the palace, or the grand Fetish houses, none but whites may remain covered, and none may be carried or ride, or be shaded by an umbrella, unless by the king's permission. If the king's stick be shown, all bow down and kiss the dust except the bearer, who is exempt.

In entering a town or house the head man presents the stranger with pure water, which he first drinks himself; and this is equivalent to a promise of safety. It is customary each morning to exchange compliments with sticks or seals, or other articles of *virtù* which may be known as the individual's representative; and each stick-bearer receives a glass of rum !

The royal wives and their slaves, I presume from the jealousy of their despotic lord, are considered too sacred for man to gaze upon; and on meeting any of these sable beauties on the road, a bell warns the wayfarer to turn off, or stand against a wall while they pass. The king has thousands of wives, the nobles hundreds, others tens; while the soldier is

Compli-
ments.

Royal
wives.

Marriages.

unable to support one. If one of the wives of the king, or a high officer's, commits adultery, the culprits are summarily beheaded; and the skull of one of the Agaou's wives is at present exposed in the square of the palace of Agrimgomeh, in Abomey. But if adultery be committed by parties of lower rank, they are sold as slaves. If a man seduces a girl, the law obliges marriage, and the payment of eighty heads of cowries to the parent or master, on pain of becoming himself a slave. In marriage there is no ceremony, except where the king confers the wife, in which instance the maiden presents her future lord with a glass of rum.

Laws and punishments.

The laws are very strict: treason, murder, adultery, cowardice, and theft, are punishable with death. Besides the form of trial illustrated in a later portion of this Journal, the cabooceers, headed by the Eeavoogan, form a court, of which the decision is subject to royal confirmation. If condemned to death, the convict is removed to the miegan's to await the

king's pleasure; if to slavery, to the mayo's, for the same purpose. Any head man of a town or district can, by prostrating and kissing the ground, declare a king's court, and try a culprit; but the sentence must be put in force at Abomey, and a public crier proclaims it in the market. All rank is hereditary and primogenitive, provided the king concurs; if not, he nominates another member of the family. The succession to the throne is also primogenitive, with the concurrence of the miegan and the mayo, who otherwise discriminate between the several next heirs of the reigning family.

The dress of the soldier and amazon is a tunic, short trowsers, and skull-cap, all in uniform. The general dress of the Dahomans is a small cloth round the loins, and a large country or foreign cloth, or silk, &c., thrown over the left shoulder, leaving the right arm and breast bare, and reaching to the ancles. Hats are seldom worn, shoes never; the king, however, wears sandals. The women wear a

Dress and
ornaments.

cloth reaching to the knee, fastened under their breasts, and leaving them exposed; as they advance in years their breasts hang as much as two feet long, and are truly disgusting to European eyes. According to rank and wealth, anklets and armlets of all metals, and necklaces of glass, coral, and Popoe beads, are worn by both sexes. The Popoe bead is of glass, about half an inch long, and perforated. It is dug up in a country inland of Popoe, and cannot be imitated: all attempts hitherto have been detected. Hence it is very expensive, selling for half its weight in gold. It seems to me most propable that where they are found, formerly stood a large town, destroyed by war, and that the dead (as is usual in Dahomey and neighbouring parts in the present day) having been buried with their ornaments, some chemical property, that has destroyed the remains of the inhumed, has hardened and slightly changed the appearance of the glass bead. The natives have a tradition that they are the excrement of a large

serpent, or dragon, which (to account for its never being seen), if man beholds, he dies.

Dahoman houses, from the palace to <sup>Houses,
furniture,
and food.</sup> the farm, all are similar. Walls, either of clay or palm branches, enclose, according to the number of inmates, courts and houses of all sizes, made of clay, and thatched with grass.

A bamboo beadstead or a few mats, some country pots and agricultural implements, and weapons, a loom of coarse material, besides the insignia of office (if a cabooceer or head man), are all the furniture. A store in each house is provided with cloths, grain, foreign goods, &c., according to the wealth of the owner. Within the enclosure are all domestic animals, and invariably a dog. The diet is simple, consisting chiefly of messes of meat and vegetable, mixed with palm oil and pepper, with which is eaten a corn cake called kankee, or dab-a-dab. There is very little variety. A mixture of beans, peppers, and palm oil, is made into a cake,

and sold to travellers; yams and cassada form the staples of food. Foreign liquors are scarce and expensive; and as palm wine is forbidden by the king, the chief drinks are a very palatable malt called pitto, and a sort of burgoo called ah-kah-sar. Drunkenness is not allowed; nor is there, except in Whydah, much opportunity for it. As a public example, the king kept a drunkard and fed him on rum, and exhibited him at the Customs, that his emaciated and disgusting appearance might shame his people from making beasts of themselves: this terrible example is dead.

Agriculture.

In agricultural pursuits they are advanced in knowledge, but extremely indolent, keeping but a tithe of the land in cultivation. Corn and beans are intermixed; and the land, although rich, highly manured. Palm plantations are also planted with corn, yams, and ground nuts. In short, in the small portions that are undercultivation, they rival the Chinese. The agricultural implements of both nations, excepting the plough, are similar; but

whilst the Dahomans, equally with the industrious Chinese, lack the energy to overturn a bad traditional system, they fall far short of them in industry and application. In the neighbourhood of Abomey, unlike the rest of Africa, men labour in the fields, and the women are only employed in carrying water.

An operation which, if carried out generally, would soon put an end to foreign slavery has been already commenced. Near Abomey is a royal plantation of palms, corn, &c. called Leffle-foo. It is inhabited by people from the province of Anagoo, prisoners of war, and is under the direction of a Dahoman cabooseer. The gifts of nature are all bountifully bestowed, and the soil rich and capable of producing every vegetable prouction. Indigenous are the palm, shea-butter, and cotton (the latter perennial and uncultivated), much fine timber, and many medical herbs and fruits; granite, iron, and sand-stones, conglomerate, and chalk, are expossd.

Royal .
palm plant-
ation.

The Dahoman language is harsh and *Language.*

guttural, poor and ill expressed in metaphors and parables: there is no written character.

**Religion.
Fetishes.**

The religion of Dahomey is a mystery only known to the initiated. There is no daily worship, but periods at which the Fetish men and women dance. They who are initiated have great power, and exact much in return. It is a proverb that the poor are never initiated. The Fetish of Abomey is the leopard, that of Whydah the snake. The human sacrifices at the See-que-ah-hee are neither to the invincible god "Seh," nor to the Fetish "Voh-dong," but to the vitiated appetites of the soldiery. At the Cannah Customs there are sacrifices to the Voh-dong; and at the See-que-ah-hee there are sacrifices to the manes of their ancestors; the Dahomans, like the disciples of Confucius, looking to their departed ancestors for blessings in this life, and in the world to come. There are private sacrifices all the year round. If a rich man dies, a boy and a girl are sacrificed to attend him in the next world. Thus, when

Da Souza died, a boy and a girl were decapitated and buried with him, besides three men who were sacrificed on the beach at Whydah. At all Customs there are human sacrifices, yet much diminished in numbers. This year (1849) at the Customs 32 were sacrificed, last year 240. God grant they may soon see the errors of their ways! Religious toleration in Dahomey has as yet been confined to the followers of Mahomet, for whom there is a mosque in Abomey, and another in Whydah, with several mollahs from Haussah and Bornou.

The only act of grace becomes one of slavery if examined. The liberated African from Bahia or Sierra Leone is received at Whydah on a footing with the white man, but if he stirs he is fettered ; he dare not leave the capital, even to return to the place of his birth, nor even to attend the Se-que-ah-hee, unless with a present according to his pretensions.

There are certain ancient rules which must be conformed to on pain of imprisonment, slavery, or death ; but the present

Ancient
rules.

king seldom puts his own subjects to death, or allows them to be enslaved by foreigners. By these rules no man must alter the construction of his house, sit upon a chair, be carried on a hainmock, or drink out of a

Extortion
by presents.
Offices.

Travellers in Dahomey are often much imposed upon by the national custom of making no charge for either a service or an article, but of expecting a present in return. It is not for some time that the value of an article or a service can be determined, and each servant has his peculiar ideas of sufficiency. Always expecting more, he will make no charge: and if the traveller give less, he will not take it; if enough, he is not satisfied; and if more, the stranger has stamped the price for his sojourn — it will never be reduced. No office under government is paid, and the offices, although hereditary, are subject to much espionage. In the house of each minister lives a king's daughter and two officers: these superintend the minister's trade, on which he pays tribute according to their

report. If a dispute arises in which the king's interest is at stake, these officers report direct ; and if the dispute is serious, the minister is arrested or fined. The whole system is one of espionage, cunning, and intrigue ; and no man's head is safe on his shoulders for twenty-four hours.

Taxes are heavy to all parties, and farmed to collectors. The holders of the Customs have collectors stationed at all markets, who receive cowries in number according to the value of the goods carried for sale. Besides these, there are collectors on all public roads leading from one district to another, and on the lagoon on each side of Whydah ; in short, every thing is taxed, and the tax goes to the king.

Taxes, and
their col-
lectors.

If a cock crows in the highway, it is forfeited to the tax-gatherer, and, consequently, on the whole distance from Abo-mey to Whydah, the cocks are muzzled. On the lagoon and public roads, there are toll-gates, at which a custom duty is demanded. These, with the annual presents at the Customs, the tithe on palm oil of

one gallon out of eighteen, and the duties on foreign trade, form the legal revenue of his Dahoman majesty.

Money.

The currency of the Dahoman kingdom is the cowrie shell, of which 2,000 are calculated to form one "head," to which a nominal value of one dollar is attached. Such, however, is the scarcity of a metallic currency, that, in exchange, the silver dollar is eagerly taken at 2,400 to 2,600 cowries; and other metals, as well the lower as the higher, are freely taken in barter. This scarcity of a metallic currency affords a good opening for a trade in bullion at Whydah, the effect of which could not but be to materially arrest the progress of the slave trade.

Life in Dahomey.

The every-day life of a Dahoman, it would be a difficult matter to describe, depending as it does on the whim of the sovereign. Should a man inherit industrious habits, he must be very cautious in developing them, lest he fall under the suspicion of the government. If he brings more soil under cultivation, or in any manner ad-

vances his family to riches, without the license of the king, he not only endangers his fortune, but his own life and the lives of his family : instead of becoming a man of property and head of a family, he is condemned to slavery ; and, serving his Majesty or his ministers, assists unwillingly to uphold the laws that have ruined him, his only alternative being death.

The stopping the slave trade no doubt would assist to alter such an unfortunate state of affairs ; but the true destroyer of such gross evils would be the advancement of civilisation,—the instruction of the mind by the enlightenment of a religious education.

In their every-day life there is a great similarity in all barbarous nations ; generally the ruler is supreme, and the director of the customs by which, under the sovereign, savage nations are governed. All black nations, in common with many less barbarous, as for instance the Chinese and Malays, in speaking of the organ of man's understanding, imagine that we

derive reason and wisdom from the belly. In this there is not so much cause for wonder as is generally considered : with a wild man the day's pastime is regulated by appetite, and by the state of his stomach he is ruled. The uneducated black looks upon eating and drinking as necessary evils they are compelled to submit to ; and, while satisfying the cravings of hunger and thirst, only partake of a sufficiency to sustain nature, and give the necessary strength to enable them to pursue their course of duty. These primitive habits suffer materially on the common advance of civilisation and intermixture with Europeans ; unless particularly guarded against, the luxury of intoxication completely prostrates the unfortunate barbarian, and, as with the Indians of North America, might probably exterminate the aborigines of Africa contemporaneously with the advance of civilisation.

Measure of time.

Although time is measured during the day by the cravings of the stomach in a great measure, I do not mean that a constant sense of the sun's regularity does not

convince the negro that it marks the period of day; and in Africa its rising and setting being generally regular, time would require but little other measurement, were it not that for six months of the year (the rainy season) it is generally obscured for the greater part of the day. They have an odd method among the warlike tribes of judging time by night, which is generally managed very correctly. At each gate of a stockaded town is posted a sentry, who is provided with a pile of stones, the exact number of which is previously ascertained. The night is divided into four watches; during each watch, the sentry removes the pile of stones, one by one, at a measured pace from one gate to another, calling out each tenth removal: when all are removed the watch is relieved.

The walled towns are particularly vigilantly guarded, and besides sentries and dogs, it is not uncommon to place a town under the charge of the fetish or charm of some particular kind and divinity. The most useful of these I met with was in a

Town
guards.

stockaded town called Iomiqui. In the lighter portions of the bamboo stockade, thousands of the small palm bird (a very domestic little bird of the sparrow family, particularly noisy) had built their nests. The old chief with exultation told me war dared not come; for if it did it would be proclaimed by thousands of these fetish, and the whole town be on the instant in arms for its defence. As their larger feathered brethren the geese of Rome, saved the Capitol, so might the palm birds save Iomiqui by their shrill and discordant cries.

THE JOURNALS.

JOURNAL OF A MISSION TO THE COURT OF DAHOMEY

IN OCTOBER AND NOVEMBER, 1849.

PART I.

FROM WHYDAH TO ABOMEY.

Oct. 3. to 16.

IN the autumn of 1849, the late Mr. Dun-
can, the enterprising African traveller, ar-
rived on that coast, with the appointment
of Vice-Consul to the kingdom of Dahomey,
and applied to the then commander-in-chief
of the blockading squadron, at the request
of the Dahoman king, for a naval officer to
accompany him in his mission to Abomey.
Appoint-
ment to
mission.
The instructions which I received on being

appointed to this mission by the naval commander, pointed out the strong hopes that were entertained of the Dahoman king being persuaded to consent to a treaty for the effectual suppression of the slave trade within his dominions. On my arrival off Whydah in the Bonetta, on the 2d of October, I had immediate proof that our mission was looked forward to with no little dread by the slave dealers, in the difficulty, which I learned, from Captain Hervey, the senior officer of the station, he had experienced in communicating with my colleague the vice-consul. Some days before my arrival, Captain Hervey, anxious to acquaint Mr. Duncan with my appointment, had ordered Lieutenant Hamilton to land with despatches. On nearing the beach in a boat of her Majesty's ship Kingfisher, that officer boarded a canoe, when the crew declared to a man that if he remained they would jump overboard and swim on shore; and the communication was eventually made by veering a small cask

through the surf. Proceeding to the back of the surf, I sent three kroomen in my kroo canoe on shore to ascertain its exact state; but, on returning, the canoe was dashed to pieces, and the kroomen succeeded in relanding.

Oct. 4th. — Having borrowed Captain Harvey's kroo canoe, I entered her at the back of the surf at daylight (though the surf was still very high), but had no sooner topped the first wave than we were capsized, and, with the three canoe men, Jack Smart, Tom Walker, and Ben Coffee, I immediately swam off, and after a good deal of trouble and danger, landed safe on the beach. The blacks, who had assembled in great numbers to view this novel mode of landing, rendered every assistance that was in their power; and having wrapt myself in a country cloth and taken a glass of raw rum, I despatched a messenger to Whydah to acquaint Mr. Duncan of my arrival.

In a short time the vice-consul arrived, and explained that he had already visited

Dangerous
landing at
Whydah.

Opposition
to our pro-
gress.

the king. Owing, however, to the extraordinary oppositions evinced by the slave dealers and others, and in order that every request the king had made might be complied with, he could not but wish that I should proceed on my mission, in which he agreed to bear me company. On Mr. Duncan's landing he had been well received, and at the court was honourably treated; but on his return, some unknown cause had changed the aspect of affairs; he was viewed with suspicion, and every annoyance practised that was in the power of his persecutors.

Reception
at Whydah.

Hammocks being provided, we proceeded to the town of Whydah, which lies about a mile and a half from the beach, on which last each large factor has a temporary store. A sandy neck separates the sea from the lagoon (about a quarter of a mile wide), and passing that the road leads through a swamp. Mons. Blancléley, agent for a Marseilles house, invited Mr. Duncan and myself to dinner. On arriving at the

French fort, a salute was fired by order of the agent.

Oct. 5th. — This morning on proceeding to the beach, I found my baggage landed by the canoes of the French agents. On my return from this necessary preliminary, I visited the viceroy, whom I found in a court-yard, in the centre of a large enclosure of innumerable huts ; he was seated on a mat, whilst in front of him were some old chairs for ourselves ; accompanying, were the French agent, and, by the viceroy's desire, the agent of the British fort.

First visit
to the
viceroy.

The Viceroy of Whydah, or Ee-a-voo-gan (minister for white men), is a tall, over-fat black, with a jovial heavy cast of countenance. He wore a large English cotton cloth round his loins, his only article of dress ; round his neck were strings of coral and other beads, and on his wrists bracelets of iron.

Oct. 6th. — At 9 A. M., the viceroy sent to request I would visit him and explain my wishes. On arriving, Mr. Duncan and

Second
visit to the
viceroy.

myself were ushered into a small apartment, and this time took an efficient interpreter, "the Black Governor appointed by the king to the English fort." The viceroy was in a particularly good humour. Having explained to him that I was the bearer of a letter from the naval commander-in-chief to the king, he received a signet ring and despatched a messenger with it to Abomey, and offered clear water and liqueurs; after which the interview came to an end in a complimentary conversation.

Oct. 7th. — This evening a little acting was indulged in by a Brazilian slave dealer, who came to explain to us that he was charged with giving information to the men-of-war; finding nothing else would answer, I peremptorily ordered him from the fort.

The vice-
roy's state
visit.

Oct. 8th. — The viceroy called in state. Preceding him were about forty soldiers armed with muskets; next came his stool of office and two banners; then the ee-a-voo-gan on horseback, supported by two attendants,

followed by a band of discordant music. He was dressed in a very fine country cloth, and wore on his arms armlets of silver, reaching from the wrist to the elbow, embossed with the lion of England and the heads of George the Third and his queen. He had no sooner entered the yard than he ordered his soldiers to salute me, by keeping up an independent fire during the interview. The conversation was purely complimentary; and, after drinking wine, liqueur, and beer, he took leave. According to the custom of the country, I accompanied my visitor for a little distance on his road.

Although Da Souza died in May, the customs to his memory are not yet closed, and the town is still in a state of ferment. Three hundred of the amazons are daily in the square, firing and dancing; bands of fetish people parade the streets, headed by Guinea-fowls, fowls, ducks, goats, pigeons, and pigs, on poles, alive for sacrifice. Much rum is distributed, and all night there is shouting, firing, and dancing.

The Da
Souza cus-
toms.

Oct. 9th. — One of the slave merchants, a native of Madeira, called. While in conversation with him at the window of the fort, some of the crew of a captured slaver passed, and became extremely abusive ; their attention was attracted by a Krooman, who had climbed the flag-staff, to look out for Her Majesty's ship Kingfisher.

Procession
of chiefs
to meet
slavers.

Oct. 10th. — The town was much disturbed, not only by the continuance of the Da Souza custom, but also by the cabooceers' going forth to meet a supercargo of a slave vessel, who has this day landed. The procession was by no means unpicturesque. First came the junior cabooceers, headed by their armed retainers, and insignia and flags, each followed by a band, mounted, under a huge umbrella ; lastly, the viceroy. This, excepting the richness of dresses and ornament, and the convenience of sedan-chairs, is precisely the etiquette of a Chinese official procession. After much firing, they proceeded to the grand fetish tree ; and, having performed a ceremony,

retired to their houses. In the evening the messenger returned from Abomey, and the viceroy's head man accompanied him. On arriving in the hall, they prostrated and kissed the ground, and then handed to me a gold-headed Malacca cane, which was explained to be my protection, adding, that his majesty commanded *Mr. Duncan* and *myself* to repair to Abomey at our earliest convenience. Having rewarded the messenger, he retired, whilst we began to think over our preparations.

Message
from the
king.

Oct. 11th. — Prepared for the journey, by purchasing fifty heads of cowries, valued at fifty dollars. Each head contains, 2,000 cowries, and ten heads form a load for a woman. Thus, to carry fifty dollars, we had to hire five women ! We next purchased fifty gallons of rum, which were placed in twenty kegs, and required ten women to carry them. Two pieces of silk as a present for the king and some cloths for his ministers, concluded our purchases. Hired twenty-six hammock-men, and sixteen men and twenty

Prepara-
tions for
our jour-
ney.

women to carry our baggage. These people are what is termed "subsisted" at two strings of cowries (eighty) a day, and, according to their work are rewarded with a present when it is concluded. My travelling dress in Africa was always a flannel blouse and trowsers, and straw hat. A small quantity of camphor in a bag, and a few pieces in a goose-quill to put in the mouth in crossing a swamp, unless already occupied by one of an invariable supply of cigars, completed my stores. The canteen contained all necessary articles for dinner and tea for two; and a liqueur-case was also supplied with glass. The hammock, which is carried on the heads of two men by means of a pole, was stored with a pillow, a change of clothes, a book, and some lime-juice, a camp bed, and two camp stools, and money in the native currency. Isidore, the eldest son of the late Da Souza, called.

Commence
our jour-
ney.

Oct. 12th. — Having made all our arrangements, and sent on the baggage, at

1 P.M. we started. According to etiquette, we had to call upon the viceroy, who asked for the king's stick. On receiving it, he prostrated and kissed the dust, then returned it, and told me that the stick was sufficient protection, but, as an additional escort, he gave me his "hand and foot," his head man Narwhey (whom I have since discovered to be the greatest rascal I ever met, as future Journals will illustrate). He then asked me if I was desirous of the black interpreter, Mr. ——, mentioned before, to accompany me. I told him, No; that he was a well-known spy of Domingo Martins, and a very unfit companion; that he had never asked me, but when in my hammock, leaving the fort, he had told me he was going to Abomey; to which I replied, that he should not accompany me.

Besides Mr. Duncan and myself, the interpreter, Mark Lemon, rode in hammocks. Mark Lemon is the grandson of an English corporal of the fort in Governor James's

Madiki the
command-
ant.

time, and now commandant for the king of Dahomey. Time has changed his name; the Lemon is seldom heard, and the Mark has become Dahomanised into Madiki: a poor simple-minded man, holding the king of Dahomey in the light of a god. Passing through a flat country, overrun with grass (but in the season burnt down and planted with corn), interspersed with a few palm-oil plantations, at a distance of five miles we halted during a thunder-storm at the town of Savee. This town was formerly the capital of the kingdom of Greigwei, and the seat of trade; one hundred and fifty years since, the site of the foreign forts, which were afterwards removed to Whydah. Let it not be supposed, in speaking of cities and towns, that these are intersected by streets or ornamented by public buildings. Except a royal residence, all buildings are similar; and a cluster of enclosures forms, according to the ground it occupies, a city, a town, or a village. Savee has one peculiarity: in Whydah all the houses are of

clay; in Savee, of palm-branches, and very low. So soon as the tornado had passed, we journeyed on to Toree, five miles further, ^{Toree.} passing through a well-wooded country. At Toree, a large fair is held on every fourth day, where goods are exchanged, and passed into the interior. The town is small and has no prominent feature. Narwhey has a large farm there, at which we slept for the night. What was my surprise to find my black friend, Mr. —, arrived before me, and now facetiously prominent in assisting me from my hammock. Calling Narwhey to me, I explained to him that I should start on the morrow at six A. M., and that Mr. — might go at five or seven, but not with me, and that if he attempted to do so, I should forcibly eject him from my party. This man attended Mr. Cruikshanks on his mission, and, as my interpreter (who was there also) informs me, corresponded nightly with Da Souza, the eminent slave merchant.

Oct. 13th.—Leaving Toree, the country Azohwee.

is more open until, after a journey of about five miles, you arrive at the village of Azohwee, surrounded by a forest of gigantic trees, filled with monkeys of all sizes. In this forest the absence of all birds, by a freak of nature, was supplied by thousands of butterflies of every hue and most pleasing to the eye, whilst the air was redolent of the perfume of a thousand flowers as beautiful as they were fragrant. At noon we entered Allahdah, a city twenty-four miles distant from Whydah, holding a palace, the wall of which, about a mile and a half square, encloses many houses, one of which, alone, standing over the gateway, is two stories high. Here I felt I had entered the kingdom of Dahomey. Looking over the wall of the palace, was the skull of one who, too curious, had sought a taste of the pleasures of the mysteries within, now a ghastly warning to sensualists. In the square of the palace stood some fine forest trees, while a row of small trees in the centre bore each a human skull and jaw-

Allahdah.

bone; three trees, standing apart from the rest, bore the bleached remains of three brothers, whose story is thus related:— What is remarkable in Africa (where there is a multiplicity of wives), the three brothers were born by one father and one mother. When the king of Dahomey made war upon Greigwei (years lang syne), one of these brothers was found slightly wounded on the road, and beheaded as an example to others. This act of tyranny so enraged the brothers, that they demanded death or release from the ranks, and received the former. As a military example, their skulls bleach, whilst the tale is told by every urchin. Each minister possesses a house in the town, and we occupied that of the treasurer (Camboodee). It was a mere shell, entirely bare of furniture, and the walls damp and green. With the shades of evening came flights of vampire bats that almost darkened the sky, and swarms of Turkey buzzards, so ravenous and daring that

The cam-
boodee's
house.

they almost fought with our servants in the court-yard for the entrails of the fowls. During the day the bats may be seen hanging in clusters on the tall cotton trees, where the Turkey buzzards sit and sleep away their repletion, to which their active duties as the scavengers of town and country subject them. Not a scrap of animal remains escapes them, whether fresh or swarming with insect life. In the evening the king's wives sent us a present of palm-oil soup and dab-a-dab ; in return for which we sent the royal ladies some rum.

The market
of Allah-
dah.

The market of Allahdah is by no means large, but very cheap. Eggs are sold at 400 for a dollar ; oranges, which grow in great quantities, at 2,000 the dollar ; whilst eight fowls can be bought for a similar sum. Immediately in the vicinity of the town, the ground is under high cultivation, but is soon lost in forest and bush. On entering Allahdah, is a large cleared square, in which are the fetish houses ; on leaving

it, is seen a battery of fifteen guns of all sizes, lying uselessly on the ground, without carriages.

Oct. 14th.—At 7 A. M. we proceeded on our journey, and walked through a beautiful undulating park-like country, studded with magnificent trees—sycamores 130 feet high, and the huge giant cotton with its enormous girt of root spreading over 40 square feet. The variety of flower was remarkable, and, together with the brilliant and varied colours of the butterflies, rendered the scene at once fragrant and beautiful. No one that has not travelled in Dahomey will believe the beauty of its scenery. Africa is considered generally as “a wild expanse of lifeless sand and sky,” and not supposed to offer so romantic and beautiful a country, where large clusters of grapes, rough in skin, but palatable in taste, grow on all sides. The first halt was at the village of Doonoo, which, though small, supported a large blacksmith’s shed, in which the “cunning men” were indus-

Park-like
country.

triously fashioning rude hoes. At Atoogoo, another small village, we felled a tree, intending to have it removed to Whydah as a flagstaff for the fort; and thence, passing the village of Assegwee on the right, arrived at the town of Havee, boasting a royal residence in a very dilapidated state, and a grand fetish house, fancifully painted. Passing the village of Togoh to the right, we soon entered the town of Wybahgon or Whygon, fifty miles from Whydah, and took up our quarters in a fetish house. Here each farm is supplied with a separate granary, raised, as in England, on supporters; and cultivation, as usual, extends to a little distance round each town or village. Many clusters of wild pine-apple and bananas ornament the road. From this town our course deviated from north to north-east, in order to avoid a large swamp which was impassable, and which added a circuit of twenty miles to our journey from the coast of Abomey.

Forest
country.

Oct. 15th.—Started at 7 A.M., and passed

over an undulating forest country, presenting, for the first time on our journey, stones. Not a pebble is to be found for fifty miles inland of Whydah. The soil over that extent of country is a stiff red loam; but even to the depth of wells of 100 feet there are no pebbles; and granite, for grinding, and stones for pounding foo-foo, are procured from the mountains of Kong, and carried on men's heads to Whydah, a distance of about 200 miles. Every kind of burden is carried on their heads, nor have they much idea of the division of labour in slinging a large article. On our march we have passed thousands carrying goods to and fro, and noticed hardly a single instance of the use of slings for heavy burdens.

As we advanced, ironstone, sandstone, and conglomerate, increased, until lost in the oozy soil of a deep vegetable swamp, in a large forest, formerly the bed of a river, and leaving very little doubt of its being (below) a coal deposit. Such a country

Absence
of stone.

Pass the
great
swamp.

seems marked for railway enterprise. If coal can be procured at will, there is timber enough to make sleepers, for all the *chemins de fer* in the world, and iron ore sufficient for every kind of machinery. The land is capable of producing any and every thing. Gold is found in the neighbouring state of Ashantee, and doubtless may be traced here. Quartz is common in the Kong Mountains ; diamonds and other precious stones might repay enterprise. Although we made a circuit, we did not altogether clear the swamp, but passed several soft patches, in the centre of which was a market called Massee, providing for the wants of travellers. At the village of Ilomee we halted an hour ; and arriving at Sequeh, were met by a king's messenger, who came to inquire how we had passed the swamp. At 5 P. M. we halted in a large market called Troo-boo-doo, twenty-four miles from Abomey, and took up our quarters in one of the stalls. As it was not market-day, Mr. Duncan shot some

doves, which supplied the place of fowls. Game is plentiful all along the road. Guinea-fowl, bush-fowl, and partridges have been calling along our route. The forests abound in deer, pigs, monkeys; besides wild beasts, as leopards and wolves. The patakoos, as the wolves are called, are heard howling all night long in Abomey, Whydah, and all towns on our route; but the fear of the deadly cobras, which are extremely numerous, deters the native from warring against the wolves in their wild haunts, and he is content to trap them in large square traps, like gigantic models of the ingenious little machines, by which sparrows are caught by English boys.

Oct. 16th.—Started at 7 A. M. for Cannah Minah (Cannah). During the previous part of the journey, I have remarked the absence of the feathered tribe except the police of Dahomey, the disgusting Turkey buzzard. But now the plains of Cannah are gay with birds of beautiful and

Arrive at
Cannah.

magnificent plumage, of the most brilliant scarlet.

“Thick swarm the brighter birds ; for Nature’s hand,
That with a sportive vanity has decked
The plumpy nations, there her gayest hues
Profusely pours. But, if she bids them shine
Arrayed in all the beauteous beams of day,
Yet, frugal still, she humbles them in song.”

THOMSON.

Oh for a bird-stuffer ! What ought not a traveller to be ? And what does he not lose by not having studied these necessary arts ? At half-past 8 we entered the straggling beautiful city of Cannah by passing a pretty brook, situated in a picturesque bosquet. Cannah covers about six square miles of ground ; in it are four palaces of large extent, and each house has its piece of ground under cultivation dividing it from its neighbours. Here commences a broad clean road, as wide as any high road in England, leading to Abomey, with branch roads, equally good, approaching the palaces. The market is very extensive, occurring as,

usual with all large markets in Dahomey, once in four days. There is a sereness about this spot that leads the ideas far from Africa. The views are beautiful ; the dwellings clean, neat, and quiet. Numbers of aged of both sexes speak of peace ; for while the hordes of the monarch and his nobles carry war and devastation into all the neighbouring countries, Cannah (formerly the capital of Fay, then called Dawee), conquering Abomey, has retained a peace of upwards of 200 years. The cultivation in the neighbourhood rivals that of the Chinese.

All visitors halt at Cannah, and report their arrival by messengers. Having, in pursuance of this custom, selected a messenger, Narwhey prostrated himself, and then received our sticks (three in number, for the sable governor sends his also), and, presenting them to the messenger, charged him with our greeting to the king. All our party had arrived, to the number of one hundred, and we now occupied the treasurer's house. As at Allahdah, it was bare

of furniture, and very damp. Soon after our arrival we were presented with clean water, and a present of about a hundred-weight of food from the royal wives. The palaces at Cannah are vast enclosures, entered only and inhabited by the females, wives, amazons, and slaves of the king. In the walls of each are covered entries or gates, at which the monarch receives visitors; and a guard supervises the ingress and egress of the inhabitants. In the afternoon our messenger returned, commanding us to rise early and proceed to Abomey, and the mayo's stick soon after followed, with compliments.

PART II.

ABOMEY, ITS COURT AND ITS PEOPLE.

THUS, in rather less than four days, we had completed our journey from the coast to within sight of the capital of Dahomey. It was with not little eagerness that I rose at the earliest dawn, and, after taking a light breakfast, proceeded slowly along the broad road that led to the gates of the great city. On both sides of the way were several small villages, and cultivation was both abundant and good. Palm-oil trees, corn, and beans abounded, and many a noble tree of that strange kind whence the Shea butter is made by the natives. Of these trees one struck me in particular, with its thick foliage like the evergreen oak, and its profusion of butter-nuts, as large as pigeons' eggs, covered with a palatable pulp. On either side of the highway, roads branch off to the several palaces, in-

The road
from
Cannah to
Abomey.

cluding that of Bah-dah-hoong the residence of the heir-apparent to the Dahoman crown. Of the villages, that of Leffle-foo is peopled with captive Anagoos, the name of one of whose provinces it bears, under the controul of a Dahoman cabooceer, and is justly remarkable for the superiority of its cultivation and the industry of its denizens.

The city of
Abomey
and its de-
fences.

Within about a quarter of a mile of the city gates, on either side of the road, under sheds, stand a couple of two-and-thirty-pounder carronades. From thence, to the very gates, the road is lined by the Fetish houses, numbering more than sixty. To the left is seen, on the outskirts of a copse, a palace, surrounded by a high red clay wall. No visitor can enter Abomey without a sensation of disappointment in the want of grandeur, and disgust at the ghastly ornaments of its gateway. The city is about eight miles in circumference, surrounded by a ditch, about five feet deep, filled with the prickly acacia, its only defence. It is entered by six gates, which are simply clay walls crossing the road, with

To face page 69. Vol. I.

THE GATES OF DAHOMEY.

two apertures, one reserved for the king, the other a thoroughfare for his subjects. In each aperture are two human skulls ; and on the inside a pile of skulls, human, and of all the beasts of the field, even to the elephant's. Besides these six gates, the ditch, which is of an oval form, branches off, at each side the north-west gate, to the north and north-west, and over each branch is a similar gateway, for one only purpose — to mislead an enemy in a night attack. In the centre of the city are the palaces of Dange-lah-cordeh and Agrim-gomeh, adjoining; on the north stands the original palace of Dahomey ; about these, and to the south gate, are houses, the most conspicuous of which are those of the ministers. In front of Agrim-gomeh is an extensive square, in which are the barracks and a high shed or palaver house, a saluting battery of fifteen guns, and a stagnant pond. Just inside the south-east gate (the Cannah) are a saluting battery and pond, and numerous blacksmiths' shops. The roads or streets are in good order ; and, though there

are not any shops, the want of them is supplied by two large markets — Ah-jah-ee, to the eastward of the central palace, at once a market, parade, and sacrificial ground ; and Hung-jooloh, just outside the south gate. Besides these are several smaller markets, the stalls of which are all owned, and are generally attended, by women, the wives of all classes and orders, from the miegans to the blacksmiths. The fetish houses are numerous, and ridiculously ornamented. Cloths are manufactured within the palaces and houses. The only other manufacture is in a pottery, which, with a dye-house, is a royal monopoly, inasmuch as the royal wives work them ; and none may approach the factory. Within the city are large waste lands and many cultivated farms. There are no regular streets, and it is difficult for a European to imagine himself in the capital of a large country, as all the houses are surrounded by high red clay walls, which enclose large forest trees, besides orange, banana, and other fruit trees. All the houses are low and thatched, and one only,

in the palace of Dange-lah-cordeh, and one in that of Cumassee, can boast of two stories. Leaving the south gate, the traveller passes through the town of Beh-kon, occupied principally by the palaces of Cumassee and Ahgon-groo, and the houses of the ministers; whilst from the south-west gate the road leads to another royal palace. The Dahoman capital is, in fact, entirely unprotected by its walls and gates, and built in the most ill-judged of positions for so large a city. For a distance of five miles on every side there is no water. Passing out of the north gate, the traveller soon arrives at a most beautiful point of view. Standing on an eminence of some hundred feet, a fertile valley lies stretched at his feet, bounded in the extreme north-west by the lofty summits of the Dab-a-Dab hills, tinged with blue, and looming larger from the distant view. Here and there about this fertile plain are small oozy reservoirs of water, from which the sole supply of that necessary element is obtained for the populous city. With so scanty and precarious a supply, it may be well supposed

that fresh water is a luxury in Abomey, and the cry of "Seedagbee" (good water) as constant as the "Agua de Lisboa" of the Gallegos in Portugal. On the north-eastern side of the capital the farms are dependant solely on the rain-water collected during the rainy season, and secured in deep pits smeared on the inside with palm-oil, whence it is drawn off into earthen vessels, and thus stored up within the houses until the return of the rainy period.

Preparation for our first interview with the king.

Within a short distance of the royal residence we halted at the house of a friend of our interpreter's, where we dressed in our full uniforms, and then moved forward to some shady trees to await the arrival of the cabooceers who were to conduct us to the royal presence. In our rear were arranged our followers, hammockmen, and a crowd of Dahoman spectators. About a quarter of a mile from us stood a vast assembly of cabooceers and soldiers, with umbrellas of state, flat-topped, and ornamented like those of the Chinese, and banners of every hue and most varied devices.

Besides the Dahoman standards, each of which was ornamented by a human skull, floated the national flags of France, England, Portugal, and Brazil, whilst every cabooceer had his own particular pennon.

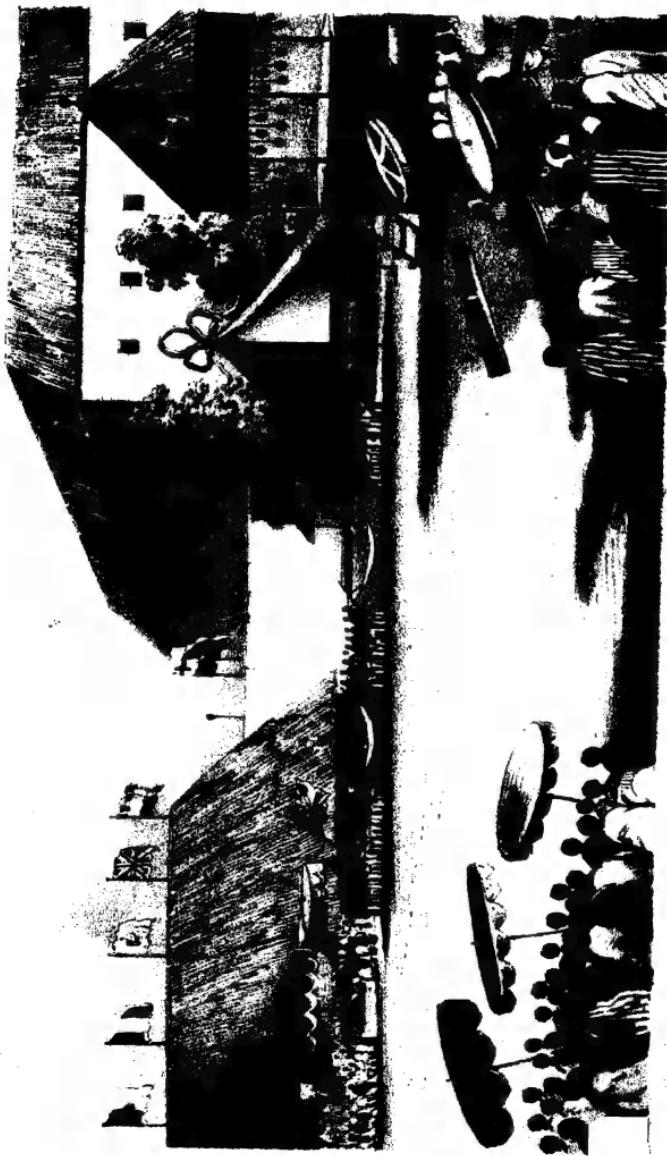

The first chief who advanced from this gay crowd of cabooceers was Boh-peh, the governor of the capital, dressed in a country cloth wrapped round his body, a slouched hat, necklaces of coral and other beads, and armed with a handsome sword. Behind him came a retinue of soldiers, his standard, his umbrella of state, and his stool of rank ; and, lastly, a band of most discordant music. Arrived in front of our position, he bowed, and then marched, from right to left, round our seats three times, completing each circuit with a low obeisance. On his third round he discharged three muskets and danced a short measure, then advanced and shook hands, and seated himself on his stool of office, which its bearer had placed on my right hand. Ah-hoh-peh, the king's brother, and Gaseh-doh, the chief of the cabooceers of Abomey, followed with

Visits from
cabooceers
and king's
brother.

similar attendants and ceremonies. When the whole party was seated, a body of the royal household, having half their heads shaved, took position in front, and sang a hymn of welcome to us. They were showily dressed in scarlet trimmed with yellow beads and other ornaments, with their heads covered by silver caps, some of which were distinguished by a pair of small silver horns, such as are commonly worn in the northern parts of Africa, and especially in Abyssinia. In his right hand each carried a horse-tail whip, with which he beat time to the air of the chant.

Next advanced Poh-veh-soo and his party of blunderbuss-men, who, after passing round us three times, fired a salute. Poh-veh-soo, as will be seen in a future journal, is at once a military officer, court-fool, and headsman,— the latter office no sinecure. So soon as we had completed the usual ceremony of drinking healths, we entered our hammocks, and, joining procession after the cabooceers and their levees, amid the firing of muskets, blunder-

THE RECEPTION OF THE "AH-HAUSSOO - NOH-BEH"

busses, and short brass guns, marched to the palace square.

The walls of the palace of Dange-lah-cordeh are surmounted, at a distance of twenty feet, with human skulls, many of which ghastly ornaments time has decayed, and the wind blown down. Happy omen! they are not replaced. The square of the palace was filled with armed people, seated on their hams, the polished barrels of their Danish muskets standing up like a forest. Under a thatched gateway was the king, surrounded by his immediate wives; while on each side sat the amazons, all in uniform, armed, and accoutred; and in the centre of the square squatted the males. Hundreds of banners and umbrellas enlivened the scene, and a constant firing from great guns and small arms increased the excitement.

Present-
ation to the
king at the
palace of
Dange-lah.

When near the king's seat we came to a halt, while the cabooceers bowed down and kissed the dust. Passing before the throne, we bowed and made the circuit of the square three times, the cabooceers pros-

trating, and ourselves repeating our obeisances each time that we passed the royal seat. On the third time, the ministers and cabooceers formed a line to the king's position; and, as we stept from our hammocks, the king, who had been reclining, rose, and forty discordant bands struck up a quick step, whilst guns were fired, and all shouted except the ministers and cabooceers, who prostrated themselves and threw dirt on their heads as we advanced and shook hands with the king. His Dahoman Majesty, King Gézo, is about forty-eight years of age, good-looking, with nothing of the negro feature, his complexion wanting several shades of being black; his appearance commanding, and his countenance intellectual, though stern in the extreme. That he is proud there can be no doubt, for he treads the earth as if it were honoured by its burden. Were it not for a slight cast in his eye, he would be a handsome man. Contrasted with the gaudy attire of his ministers, wives, and cabooceers (of every hue, and laden with coral,

gold, silver, and brass ornaments), the king was plainly dressed, in a loose robe of yellow silk slashed with satin stars and half-moons, Mandingo sandals, and a Spanish hat trimmed with gold lace; the only ornament being a small gold chain of European manufacture.

Taking our seats on chairs facing the royal mat, we entered into a complimentary conversation, the king asking many questions about our sovereign and England, and afterwards of Messrs. Freeman, Cruikshanks, and Wynniett, who had preceded us at his court. The ministers were then introduced by name, and we all drank together. Next, about forty cabooceers were similarly introduced.

The English mother was now pointed out (for this arrangement see journal of the customs), and we were placed under her care.

His Majesty, having asked me if I would wish to see a review of the amazons, to which I acquiesced with delight, ordered three regiments to be paraded. The

Review
of the
Amazons.

ground was changed, the men falling back, and a square was marked out for the review. One regiment was distinguished by a white cap with two devices (blue alligators), another by a blue cross, while the third had a blue crown. The officers were recognised by their coral necklaces and superior dresses; while each carried a small whip, which they freely plied when required. After being inspected, they commenced an independent firing, whilst at intervals, rushing from their ranks, many of them would advance to the foot of the throne, address the king, hold aloft their muskets, and then return and fire them. During the review the ministers assembled on the left of the king. On his right were some high officers of the amazons in uniform and neat accoutrements, performing their offices about the king's person: one held a silver spittoon, another the royal hat, a third the club,—a handsome ebony stick ornamented with silver; one proclaimed the conquests of the Dahoman army, while two, as heralds, with long

trumpets, blew a blast, and then blazoned forth the numerous names of Gézo, the king of kings. Immediately in rear of the king sat the "Light of the Harem," under a handsome crimson and gold parasol; around her many an envious maid, whose turn it might be soon to be thus honoured. Their dresses were more gaudy than rich, ornamented with coral and glittering beads.

The king having asked us to drink, rose, with his glass in hand, and tapped each of ours; then there thundered forth a salute of guns, almost drowned by the shouts of the multitude. The ministers and cabooceers danced, and the eunuchs and ladies held cloths before the king. Men must not see the king eat or drink.

When the firing was over, Ahpolpoo-nomeh and Hie-tengah, the colonels, and many amazon officers, were introduced, and drank our health; in return, I gave them two kegs of rum. The chief of Dassa was then introduced: he was a prisoner on parole, the same chief that was uncivil to Mr. Duncan on his travels. We now took leave;

the king, in compliment, seeing us on our road. As he stept forth, the whole crowd rose as a man, fired off their muskets, and shouted ; the din and noise was consequently terrific. They then closed round the king, whilst the bands played a quick step. When we had arrived at the end of the square he took leave, shaking hands and snapping alternate fingers and thumbs thrice. The mayo's retinue continued firing, shouting, dancing, and singing all the way to our residence in the mayo's enclosure — a small neat house in a retired part, having two orange-trees and a kitchen enclosed in a yard, and hence private.

No king could have been more civil or more condescending ; yet, in all it was observable, that the visit of white men, and show of reception, amused his people and enhanced his own greatness in their ideas. In the journal of the customs the power of this king will be illustrated : suffice it here to say, as a military chief he is feared by all his neighbours, and the terror of his name is the strongest tie he has, and effects

far more than the strength of his army ever could. Africans have but a poor means of counting ; and, although their memory is retentive, cannot retain numbers, and beyond a thousand they have but little idea. These soldiers being yearly at war, have gained a fame that, if fairly tried, would soon be found wanting.

Oct. 18th.—Having made up my present (Mr. Duncan had made his on a former visit), I sent it to the king, with a message to say, that I had landed unawares, but had collected a small present at Whydah. It was graciously received. I sent a small donation also to the miegan, the prime minister, mayo, grand vizier, camboodee, treasurer, agaow, general-in-chief, e-a-wal, English inother, with similar messages.

Daylight had scarcely broken when, one after another, in came the sticks of the king, and every man of note in the town, even to Hee-tou-gee, the siloe's smith, inquiring after our health. Each was carried by two or three men ; and as each man

Presents to
the king.

Interview
with the
king.

required a glass of raw rum, and these inquiries are repeated every morning, in a long sojourn they become a great nuisance and a great expense. After breakfasting early by command, by 8 o'clock we were in full uniform in the palace square, which was now clear. The mayo immediately left us to be gazed upon by a collecting crowd, and to report our arrival to the king. In about half an hour, the great gate was thrown open, and, passing through an inner court, we were ushered into the *entrée* of a small room, ornamented with military arms and accoutrements. On a bed, covered with a very handsome mat, reclined the king. In the room were the female ministers squatted on the ground; while, as we advanced and the king rose, the male ministers—the mayo, camboodee, caoupeh, and Toonoonoo—prostrated and kissed the dust. Having shaken hands, we became seated, and the ministers rose from their degrading and disgusting position to take their actual station, without

whose concurrence the king cannot act. It is extraordinary that while the miegan and the mayo wallow in the mud in the royal presence, they have, if united, actually more power than their sodesque.

After many compliments, his Majesty requested me to read the commander-in-chief's letter. Handing it to him, he broke the seal and returned it. I then read its contents piecemeal, so that the interpreters might the better explain it. His Majesty listened attentively; and then explained that he was not accompanied by those officers who should form members of so serious a palaver, but if I would attend his Customs, he would give an answer. He then dictated a letter to the commander-in-chief, in which he promised to give me an answer at the Customs. Asking if we intended to visit the market, he ordered ten heads of cowries to be sent with us to purchase articles with.

Mr. Duncan asked the king if he could acquaint him with the fate of Dr. Dickson,

The fate of
Dr. Dick-
son.

the fellow-traveller of Clapperton. He informed us as follows :—Dr. Dickson appeared at my court, accompanied by the late cha-cha, Da Souza, at whose instance I furnished him with a guard of sixty men. After a short stay, during which he had the fever, and shaved his head, he set out. Arrived on the frontier, all but four men returned ; the remainder, under the officers Ah-moo-soo, Ah-sok-bah, and Boogboo accompanied Dr. Dickson, through Chah to Noofee, on the road to Haussa. After leaving Noofee, all trace was lost, and none had ever since been heard of. He then explained that he was going, as soon as we left, to Tengee, to make a Custom to the memory of his mother.

Having drunk the healths of the king of Dahomey and the queen of England in champagne, we asked leave to retire, much pleased with the novelty of our interview.

As we left the palace gate, hardly a soul was to be seen in the square ; but no sooner was the king outside, than thousands of

armed men flew from all sides and assembled, firing and shouting round the monarch. On returning to our friend's house, we changed our garments, and went to market and purchased some pottery, dresses, and country cloths.

Close to the market stands a monument to commemorate the subjugation of Anagoo. In Dahomey there are but few tracts in which stone is deposited : the Anagoos had a tradition, which they steadily believed, that when their enemies removed stones the country would fall. The Dahomans conquered them, and fulfilled the prophecy by causing the whole army, each (soldier and camp follower) to carry a large stone. Nearly all are granite in different stages of formation. Several of the royal family called, not without expecting and receiving a present.

Oct. 19th. — At six, a table was set outside our gate by the mayo, with wine and refreshments ; and we were invited to listen to a salute fired. Having drunk the health

Presents
from the
king.

of his Majesty, soldiers stationed along the road hurraed, and a royal salute was fired ; followed by two salutes of nine each, for myself and Mr. Duncan. During the royal salute, a party of the royal wives passed, and, headed by the aged minister, we had to leave the gay and festive scene, and hide our diminished heads — against a wall ! Immediately after we received his Majesty's present, consisting of, to each, a bullock, cloth, ten heads of cowries, one keg of rum, one jar of palm oil, one calabash of flour, one of country soap, one of peppers.

To Madiki, the interpreter, two heads of cowries, two bottles of rum, one goat, one calabash of flour, one jar of palm oil. To Narwhey, two heads of cowries, one bottle of rum. To Majelica, head of followers, one head of cowries, one bottle of rum. To our kroomen, two heads of cowries ; hammock-men, two heads, and two bottles of rum. Besides the above, every day we received about two bushels of food, palm oil, soaps, and dab-a-dab, &c. Mr. Duncan presented the king's weaver with a spinning-wheel.

He has the foot of a giant, and is extraordinarily clumsy. He has seldom been absent an hour, breaking the threads, leathers, &c., and drinks an awful quantity of rum.

Many people called ; some bringing one or two yams as a present, all requiring a present in return. These presents are a terrible nuisance : the whole system is in donations, expecting more, at least an equivalent, and never satisfied. Mr. Duncan is a proficient on the Jews harp ; and several old friends have called, bringing their instruments, and asked for new lessons. How quickly the black ear catches a tune ! One man, Attah, plays all the old Scotch airs well. Strange as it may sound, in a barbarous African country, women are passing our door, like the gallegos of Lisbon, crying "See-dag-hee See" (sweet water, water). Close to the mayo's house are the city shambles. A good supply of meat is killed, considering the black races do not generally eat much animal food, "unless when they have not to pay for it."

The case of
the kroo-
men. Our
departure.

Oct. 20th.—Rose at daylight and packed up. A krooman entered our yard the day before yesterday, and, giving him in charge of my head krooman, I sent for the mayo. By some neglect the man was missed. He stated, in good English, that he and another were left of the crew of an English merchant vessel wrecked on the Popoe coast, and had been sold into slavery. No doubt remained in my mind but that he belonged to the mayo: who as stoutly denied all knowledge of him, and promised to search for him. This morning, being ready, the mayo sent to say we might go. I, knowing it to be his duty to see us away, sent to say we were awaiting his visit. In answer, he stated that he was attendant on the king, and that if we wanted to see him about the kroomen they should be sent to the Vice-Consulate when discovered. Fearing lest these men should not be considered as British subjects, I thought it best to leave the matter for the opinion of the government, and we left. Mr. Duncan

has been poorly for some days, but to-day evinced symptoms of suffering from dysentery. I walked to Cannah, a very pleasant walk, and there we halted to collect our baggage, and give Mr. Duncan rest. It was market-day; at the roads leading to the market stood tax-gatherers, demanding from five to ten cowries from all who carried goods to sell. Round one of the palace walls, called Allahwhey, was a rope of grass: this is a fetish against fire.

Oct. 21st.—Arrived at Allahbah, fourteen miles from Cannah, and near the swamps. Mr. Duncan very unwell. In the afternoon a terrible noise drew my attention, when, on examination, I found some of our hammockmen and the townspeople at a war of words. Presently the head of the town rushed in amongst them, prostrated, kissed the dust, and, taking his seat on his hams, all squatted down peaceably, scarcely a moment after. Narwhey arrived too late; and in a terrible passion he rushed on one of the hammockmen, and fairly pummelled

A king's court.

him ; while the head man called to him to desist, and that his conduct was contempt of court. He fell back among the crowd, a quiet but enraged spectator. The cause was this : my kroomen had given one hammockman twelve strings of cowries to buy a large fowl, and the hammockman had paid eight. The woman, hearing that twelve had been given, after the fowl was killed demanded restitution or the money. A squabble ensued ; and, lest the narwhey should take up the case, the head man of the town proclaimed a king's court, over which he alone, in his district, is judge. Several of the villagers made speeches, and condemned Narwhey's conduct. After fully proving the charge, in consideration of the prisoner being the servant of a white man, he was let off with paying the whole sum to the woman. The judge again kissed the dust, the hammock-men knelt and clapped hands in token of submission, then all kissed the dust and separated, and the king's court was thus dissolved.

Oct. 22nd.—Reached Whyboo, having crossed the swamp. Passed a man wrapt from head to foot in a cloth, and guarded. His guards told me he was "sick." At the sight of him the hammockmen ran into the bush, and beckoned me to do the same, and I was warned off in the king's name. This was either a culprit sent for commitment to Abomey, or a captured slave; I should infer the former.

Oct. 23rd.—Reached Allahdah; whereupon the governor sent me a present of two fowls, twelve eggs, six yams, and some clean water.

Oct. 24th.—Reached Torree. Mr. Duncan very ill. Sent to the British agent to beg he would not salute when we arrived. Visited the cabooseer, who was engaged with fetish men making a chair.

Oct. 25th.—Arrived at Whydah, the British fort. Mr. Duncan immediately went to bed with, what we thought and treated him for, dysentery.

Visited the viceroy, who prostrated before the king's stick. Having hired a house

Arrival at
Whyboo.

in the town, I had scarcely retired to it when I was astonished to hear twenty-one guns fired from the British fort; and for what, forsooth? In honour of a present given by Domingo José Martins to the king, of thirty puncheons of rum: a distribution in all to the value of 5,000\$, to the king, cabooceers, the late Da Souza's family, and people. Three pipes were run in the public square for the mob to wallow in.

Oct. 26th.—Domingo José Martins sent Mr. ——, the “black” before alluded to, with his compliments, to offer me anything his house afforded. Signor Tacinta de Rodriguez, the Madeira merchant, was very kind in assisting me to make up medicines for Mr. Duncan.

José Martins' house.

Oct. 27th.—Called to thank Martins. His house is well furnished, but a mere show-house, he living in a small place adjoining. He has a large European garden and fine orange grove. He kindly placed his canoe-men at my disposal, which, as the British factory have none, I *per force* gladly accepted.

Oct. 28th.—Visited the viceroy to take leave, intending to embark on the arrival of the first man-of-war. After many demands for small articles, on my return I took leave; he explaining to me he would acquaint the king with Mr. Duncan's illness, and offering native doctors and medicine, if required; adding, all you white men are doctors, and the worst of you better than the best of blacks. On passing from his house (the grass very high) I observed, within an inch of my leg, a small lizard with its eyes fixed. It did not move on my approach. At the same moment a cobra darted at it, and before I could raise my stick, bore it away; rather a narrow escape from death.

The peal from the bells of the Portuguese Catholic church are ringing merrily. What a pity they are not responded to by the chimes of the more simple—a Protestant — place of worship! Kingfisher anchored.

Oct. 29th.—Having communicated with Captain Haiberg, he came on shore accom-

panied by his surgeon, who decided on taking Mr. Duncan off at once. Having procured canoes, we all embarked, not sorry to be again afloat. Poor Mr. Duncan, with so many old friends (he had taken a passage in the Kingfisher) to welcome him, brightened and appeared for the remainder of the day almost recovered.

Sail from
Whydah.
Death of
Mr. Dun-

The Kingfisher fired a royal salute in honour of the king of Dahomey, and in return for the one fired at Abomey in honour of her Majesty. Mr. Duncan dangerously ill. On the arrival this day of her Majesty's ship Bonetta, I sailed for Sierra Leone; where, shortly after, I heard, by the arrival of a prize taken by her Majesty's ship Kingfisher, that three days after embarkation Mr. Duncan had fallen a victim to his attack. He died of a liver complaint; the disease aggravated by poison inhaled in opening the horse of Da Souza. He was a most enterprising man, and worthy of the remembrance of his countrymen.

By this very prize, the prize crew em-

barking on board, the Bonetta's crew suffered severely from small-pox; and, after a trip across the trade winds to Ascension, arrived off Whydah at the time named by the king for his Customs, the description of which will form the subject of my future Journals.

Return to
Whydah.

PART III.

JOURNAL DURING A SOJOURN ON SHORE IN WHYDAH,
FROM FEBRUARY 27TH TO MARCH 31ST, AND A DE-
SCRIPTION OF WHYDAH.

Return to
Whydah,
and hire a
house in
the town.

Feb. 27th.—LANDED and visited the viceroy. Was informed that his Majesty was still at war, and the time of his return uncertain. That about the time for the march, several high officers had died, and, paying respect to their memory, had detained the army until the latter end of January. When the king went to war, no one knew aught about his proceedings until he announced his return, which announcement would come from Cannah; and as he had been detained, the probability was the Customs would be put off.

Having explained to the viceroy that, at the king's desire, I had landed at the time appointed, to visit him at his Customs, and

that I bore a suitable present, in the name of her Majesty, which I had purchased at Sierra Leone, I told him I should not re-embark until I had heard of his Majesty's return, and received the announcement of some definite period to return on shore.

The viceroy told me his Majesty regretted much the death of her Majesty's vice-consul Duncan, and that immediately he heard it, he had sent his command to him, ordering him to proceed to the British fort, where he had sat a whole day while his retainers fired to Mr. Duncan's memory. That his Majesty had also sent a large country cloth, a piece of blue baft, a piece of white baft, and a piece of handkerchief, as burial clothes, and six heads of cowries to set a table, *i. e.* a wake, which articles had been given to Mr. Aberdeen.

Desiring quiet, and determined to live regularly, I hired a house in the town in preference to taking up my quarters at the fort; and while my kroomen were getting it in order, embarked on board her Majesty's ship Kingfisher.

Excursion
to Little
Popoe.

March 2nd. — Landed at Little Popoe, an extensive slave port, but one in which the trade might be easily stopped by erecting a fort on a tongue of land which commands at once the lagoon communication and the sea beach. I need only refer the reader to the chart to see that Little Popoe and Quittah are but a light march apart, and adjoined by lagoons.

The state is a republic, or rather the province of a republic. The chief or president lives at a large town at a little distance; while the town of Little Popoe is divided by the lagoon into Ajado, the slave town, under Portuguese directors, and New London, under a president (Mr. Lawson), whence palm oil is shipped.

The la-
goon.

March 3rd. — Pulled a little distance up the lagoon—a perfect labyrinth, filled with trade canoes. Indeed there appears to be a very brisk trade carried on here; and at the chief's town is one of those large markets common to Central Africa. On the banks basked several large alligators, and flocks of wild ducks passed within shot.

There is much fish in these lagoons, and beds of fine oysters, and shoals of shrimps ; although during the last half of the dry season there is a great deal of water but slightly brackish.

March 4th. — There is one terrible drawback to Popoe, it is the most filthy of towns. The stench is fearfully strong, and must render it unhealthy. The houses are badly built ; that in which I am living forms the four sides of a square, and for some " wise " reason, doubtless, all the apertures open on the inside, so that the air breathed is close and confined. One side is so old they are unroofing it, rendering the habitation of the other dangerous from the unhoused snakes, centipedes, scorpions, and all other delightful tropical household companions ; another side is occupied by Mr. George Lawson, who, as agent for Messrs. —, carries on a palm-oil trade — I believe the dirtiest of all trades — and the aroma from his side is not the most preferable ; while the fourth is a stable and

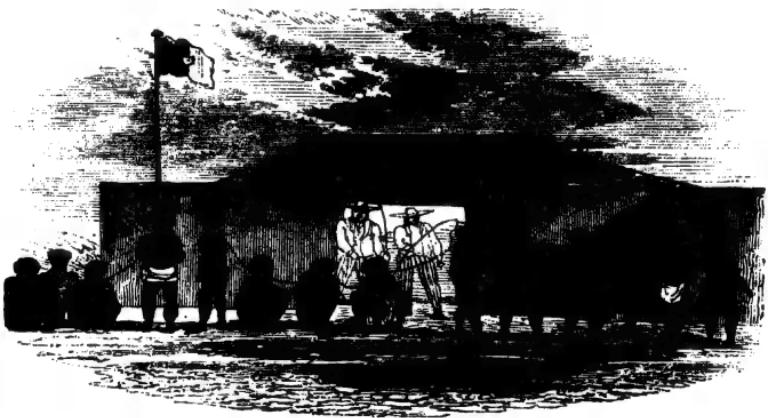

sleeping-house for the blacks, many of whom have the small-pox !

March 5th. — The shallowness of the water in these lagoons precludes the probability of any boat being constructed light enough to navigate them during the dry season. During the rainy period the prevalence of fevers and small-pox materially lessens the probability of any constitution enduring these pestilential lakes.

Mr. Lawson and his history.

March 6th. — Visited Mr. Lawson, who was got up for the occasion. He is a little old black, with a most astonishing memory, suffering under a severe hernia. He was a native of Popoe, but educated in England, and became steward of a slaver in the time of its legal trade. Besides his pay, he had a shilling a head for each slave, as interpreter to the doctor. Seven months made the voyage to and from the port of Liverpool, landing the slaves at Jamaica.

The captain died. The mate, on the return, married the widow, with a fortune of forty thousand pounds and two daughters.

THE SLAVE CHAIN.

Charlotte had ten thousand pounds, and Mary nine.

In those days the same care was taken of the slaves on the passage as of any other cargo, at least in Mr. Lawson's ship, and there was no delay. In 1812 he returned to Popoe. He has a large family, some living as Portuguese, others as Englishmen. On the eighth of February last a schooner shipped here.

Up to noon the pinnace of her Majesty's ship Ranger had been in sight, when she ran down to Argwei. At four, the schooner anchored close into the surf, laid out a kedge, and by a rope to the shore hauled the canoes to and fro: all was excitement and drinking. As her cargo was not the property of one merchant, the slaves had to be branded, and a Dutch tobacco-pipe was called in and ingeniously used in branding them with different marks, intended to represent the letters C, O, E, and X (the whole, the half, or the two halves of the bowl of the pipe). In one hour and a half she was on her return voyage.

Slave
branding.

Excursion
to Argwei.

March 7th. — Went by lagoon in Mr. Lawson's canoe to Argwei. At this slave-port, almost a monopoly of José Almeida, a vessel was expected, and the natives undisguisedly exposed their uneasiness at our appearance. Argwei is a republic, and as far as I could ascertain, ruled by a senate, with no direct head. Mr. ——'s agent was most civil, and kindly lent me a covered canoe to proceed in to Whydah.

Extraor-
din ary in-
stance of
powers of
the fetish
priests.

An extraordinary instance of the power and pertinacity of the fetish people was illustrated here last month. In a heavy tornado, the flag-staff of the English factory was struck by lightning, in a curved line, nearly to the ground. In the immediate vicinity was a store of powder, to remove which was the first care. In the mean time, the fetish people assembled round the factory and loudly demanded admittance, which being refused, they paraded the streets of the town, declaring that they had caused the fetish to destroy the flagstaff as they were "hungry;" meaning that the agent did not fee them; and that

To face page 102. Vol. I.

THE FETISH MAN, AND THE GOVERNOR OF WHYDAH.

if he did not they would kill him : that this was the third warning.

The first warning was when the present agent landed at Badagry for provisions, and while on shore his ship blew up ; the second, the loss of the Medora, lately wrecked on the Volta river. With regard to the latter, the fetish people of Volta and Accra had had some dispute, when the former warned the other, and told them that in revenge they would have an Accra trade-ship.

If it can be believed, one of the agents to the oldest established house on the gold coast is initiated into the mysteries, and is a fetish man ! This man was formerly master of a trader ; and on the master of the Medora taking leave of him at Accra, speaking with regard to the change of tide consequent on the Harmattous, that were then blowing, he remarked, " you must hang to the southward or you will chance to be on shore on the Volta." His words were prophetic, and as such claimed by the devils incarnate, his brother fetish men.

The next day they resumed their threats, and demanded the injured mast. Having entered the factory-yard, one of the party ascended to strike the heel of the topmast ; which he did by the run. The " holy " men now became afraid, and left, declaring that if they were not fed, they would certainly destroy the factory. By the advice of the chiefs, the agent compromised the matter at a loss of about 200 dollars' worth of goods. Argwei is a small, not over clean town, although an extensive trading port. It has one peculiarity—the streets, like those of Passagos, in Biscay, are passages under the houses, or rather through them.

Left at 5 P. M., and poled down the lagoon all night.

Description
of
Whydah.

March 8th. — At 9 A. M. arrived at Whydah. Since daylight to 7 I walked along the lagoon without shoes or stockings, the water just above the ankles ; and although we poled in the middle and in the deepest water, the canoe, which drew about a foot and a half water, was constantly aground in the night. My kroomen whom I left be-

hind tell me that 500 slaves were marched this week to Argwei.

Whydah is a most extensive city, consisting of seven or eight separately governed towns, although the viceroy of Whydah is the chief of all cabooceers.

The first of these is

- French town, governed by Dagbah, the Viceroy.
- 2. English town „ Hie-chee-lee, Cabooceer.
- 3. Portuguese town „ Boognon, Ditto.
- 4. Cha-cha town
 (Ajudah) „ Gnodefereh, Ditto.
- 5. Market town „ Ah-poo-dehnoo, Ditto.

Besides these, there are free towns for the liberated Africans, and a new town lately built to the eastward.

One of the benefits of these divisions is that, for instance, all the people in English town are servants "to hire," but out of respect to English visitors any number that is required is sent, and the head men of the town procure the labour.

The principal building is the cha-cha's house, a large ill-built erection of no particular form, occupying one side of the

The house
of the cha-
cha.

principal square ; and, as nothing can be cleanly in Africa, opposite, occupying a side of the square, is a corral for cattle, seldom cleaned, except by the animalcula of the exuviae that decay breeds. The cha-cha's house I had imagined was a palace, in which a prince in wealth rolled in luxury, such it has been represented ; and if dirt and filth constitute luxury, it is an elysium. Every article of table or bed-room furniture was of solid silver ; but the state of the finances at his death proved the exaggerations of his flatterers, as he died enormously in debt. Isidore Da Souza, the present cha-cha, is ordered by his royal master to pay the " legal " debts of his father, but not his debts to slave-dealers. Strange command from the king of Dahomey ! illustrative of the cunning of the king, who foresaw in the payment of extensive debts a probable decrease of tribute.

The late
cha-cha,
Da Souza.

The late Da Souza arrived a poor man. He left Rio from some political crime, in which he had the choice of incarceration

or desertion of his fatherland. Although an extensive slave-dealer, he was not without good points; and one was, his excessive kindness to all English visitors, either government officers or others. He introduced Dr. Dickson to the king, and gave Mr. Duncan the wherewithal to purchase a welcome (being at the time too ill to accompany him), and was attentive to Mr. Cruikshanks.

The best trait in his character was in his discountenancing human sacrifice, which he is said never to have witnessed, and in abolishing death as the punishment for killing (by accident or otherwise) a fetish snake. Now, the unfortunate criminal has to enter a house of straw covered with palm oil, to which a light is set, and thence to run the gauntlet through the fetish priests, who belabour him without mercy; and he is not free until he reaches water in which he washes out the sin. On these occasions the late cha-cha is said to have attended with his personal slaves, who, with

pretended zeal, mixed with the crowd and hustled round the offender, and saved him many blows.

Houses of
the great
men.

The best building in the town is the residence of Domingo José Martins, a well furnished house, standing in an orange-grove. Antonio Da Souza has a Chinese-built house, more ornamental than useful, in which he receives visitors. The forts, three in number, are all old and dilapidated. In the British fort is a fetish house of some antiquity,—strangely placed! About the forts are cleared areas, and, if in repair, they would be well capable of defence from an African army. So long as they remain in merchants' hands they are virtually a disgrace to the flags that fly from their walls. The viceroy's house is a mere enclosure of huts and one spacious court, shaded by several giant cotton-trees, in which his Excellency receives visitors when not immediately on business, lying at full length on the damp ground.

Fetish
temple.

The lions of Whydah are the snake fetish house and the market. The former

is a temple built round a huge cotton tree, in which are at all times many snakes of the boa species. These are allowed to roam about at pleasure; but if found in a house or at a distance, a fetish man or woman is sought, whose duty it is to induce the reptile to return, and to reconduct it to its sacred abode, whilst all that meet it must bow down and kiss the dust. Morning and evening, many are to be seen prostrated before the door, whether worshipping the snakes directly, or an invisible god, which is known under the name of "Seh," through these, his representatives, I am not learned enough to determine. In different parts are smaller temples covering deities, in shape, rude clay figures of men.

The market is the finest I have seen in Africa; well supplied with every luxury and many useful articles. As there are no shops, all trade is carried on here; and the market is divided into appropriate proportions for each description of article. The meat, fish, corn, flour, vegetable, fruit, and foreign goods have all separate markets.

It may not be uninteresting to know the prices of the various articles:

| | | £ | s. | d. | Cowries. |
|----------------------------|---|---|----|-------|----------|
| Turkey | - | - | 0 | 7 0 | = 4,000 |
| Guinea-fowl | - | - | 0 | 1 9 | = 1,000 |
| Fowl | - | - | 0 | 0 7 | = 280 |
| Pigeon | - | - | 0 | 0 5 | = 200 |
| Chicken | - | - | 0 | 0 5 | = 200 |
| Duck | - | - | 0 | 1 3 | = 600 |
| Bullock | - | - | 2 | 0 0 | = 25,000 |
| Sheep | - | - | 0 | 8 0 | = 5,000 |
| Goat | - | - | 0 | 6 0 | = 2,500 |
| Beef, a pound | - | - | 0 | 0 3 | = 120 |
| Pork, ditto | - | - | 0 | 0 2 | = 80 |
| Mutton, ditto | - | - | 0 | 0 2½ | = 100 |
| Egg | - | - | 0 | 0 0 ¼ | = 10 |
| Orange | - | - | 0 | 0 0 ¼ | = 8 |
| Yam | - | - | 0 | 0 2 | = 80 |
| Crabs | - | - | 0 | 0 0 ¼ | = 10 |
| Fish, a pound | - | - | 0 | 0 5 | = 200 |
| Vegetables, green, a pound | - | 0 | 0 | 0 ¼ | = 2 |

DRINKABLES.

| | | | | | | |
|--------------------------------|---|---|---|-----|---|-----|
| Rum, a bottle | - | - | 0 | 0 6 | = | 240 |
| Pitto (country beer), a gallon | 0 | 0 | 1 | | = | 40 |
| Palm wine, ditto | 0 | 0 | 1 | | = | 40 |

The house of a rich native differs in nothing from those of the commonalty,

except that the wall encloses a larger number of huts.

The cha-cha is the principal agent to the king in all matters of trade ; and to him must be subjected all commerce, whether in slaves or palm-oil, that he may have the refusal. The price is laid down by law, subject to his alteration if concurred in by the viceroy and six traders or superintendants of trade appointed by the king. These are : 1. Ah-boo-veh-mah, 2. Goo-vah-moh, 3. Oh-klah-foh-toh, 4. Toh-poo, 5. Ah-ha-doo-moo-toh, and 6. Boh-ee-ah. One or the other of these must be present at all sales to take the royal duty, which in palm-oil is about a gallon in a measure of eighteen. These men are not paid, but have the advantage of trading at the royal price, or ten per cent. under the market. They are besides political spies on the viceroy, and attend all conferences, reporting directly to the king any infringement on the royal prerogative. These are not the only spies of the viceroy ; his hours of recreation are supervised by ladies of the

The cha-
cha and
king's agent
for trade.

blood royal, presented by the king, whose reception is obligatory, and who also make private reports to the king or his ministers.

The vice-
roy and the
Fetish.

March 10th. — Called on the viceroy, and had a long conversation with him about trade. Coming events cast their shadows before them. The viceroy of Whydah is not likely to be a friend at court, although he very politely asked me to be his fellow-traveller when I went to Abomey. On leaving, a fetish man was passing the gate, with two large snakes. State officers in most barbarous countries find it more convenient to remain at home, except when duty calls them abroad. The burly officer was, according to custom, seeing me beyond his gate — and this was an opportunity not to be lost, — the fetish man addressed him at great length, in praise of his extraordinary liberality to the fetish, for which he had no doubt to pay handsomely.

Native
slave mer-
chants.

In Whydah there are five native merchants, who may be termed very rich. These are, according to their wealth, — 1.

Ahjohvee, 2. Narwhey, 3. Quenung, and two others, whose names I have lost. Neither in their dress, nor in any outward appearance could they be judged wealthy. Such show would expose them to the cupidity of the government. They own thousands of slaves, and have to supply whole regiments to the annual hunt. Ahjohvee has a large fetish house east of Whydah, situated in a pretty bosquet, intersected by pleasant walks, and fragrant in the dry season with the flowers of the cashew-nut tree, — by far the most pleasant place to walk in near Whydah.

March 11th. — All the town was gay, and all were firing off muskets, dancing, and shouting. A messenger has arrived to report that his Majesty has reached Cannah in safety. Narwhey came with the royal stick, to inform me, and with a message from the viceroy, that I might now send to his Majesty for information. I, therefore, despatched a messenger with a present of two brass musketoons to the king, reporting

Return of
the king
from the
war.

my arrival, and requesting he would acquaint me when the customs would meet.

Don José
Dos San-
tos.

March 12th. — Visited the premises of Don José Dos Santos, who, although a slave-dealer, is also a palm-oil purchaser to a great extent. He arrived here without a shilling, and now has an immense establishment, though I believe little capital ; indeed, he is said to be in debt, owing to the uncertainty of his trade. Having once embarked in the slave trade, he is still a gambler, and his speculations often bring him in a loser. Don José has a plantation on which he manufactures oil. His yard was filled with traders, — some with only a gallon, others having slaves loaded with large calabashes of oil ; while dozens of his own slaves were counting out cowries to pay for the produce.

March 13th. — Arrived her Majesty's Ship Bonetta. Went on board for a few hours. This was market-day at the four-day market at Forree ; and all Whydah was on the road, carrying foreign cloths, salt, saltfish, rum, and tobacco, to exchange for

corn, palm-oil, peppers, live stock, fruits, vegetables, and country cloths.

March 14th. — The foreign trade here is much confined. The slave trade consists in gin, rum, tobacco, romauls and other cloths, muskets, powder, flints, cowries, handkerchiefs, hardware, and glass, in large quantities; a less quantity of wine, sugar, and iron-bars; and a few silks and superior articles. The oil trade comprises many of the above-named articles, besides smaller articles, such as perfumery, inferior jewellery, and ornaments. The exports from Whydah are slaves and palm-oil. Country cloths, peppers, corn, ivory, and shea-butter can be procured in small quantities.

Visited a very extensive palm-oil plantation belonging to Ahjohvee. It lies to the eastward of Whydah; and very little labour is added to the gifts of God in procuring this valuable and lucrative article of trade. On the estate are many establishments, slave villages, for the manufacture, which is very simple. The nut is first boiled, then, thrown into a large recess, and

The trade
of Whydah

Manufacture of
palm-oil.

trodden out: then boiled again, and the oil is collected. The nut within is a very nutritious article of food, tasting like the cocoa-nut.

Dialogue
with the
viceroy.

March 15th. — Visited the viceroy, and found him reclining at full length in his shaded court-yard. In the course of conversation I endeavoured to impress upon his mind the advantage that would accrue to the king, if, instead of sacrificing or selling his prisoners of war, he retained the labour in his own country, and he would soon see his advantage in this, and the folly of enriching a foreign and distant land at the expense of his own natural resources. I explained to the ee-a-voo-gan that each had the interest of his own sovereign doubtless at heart, and that we had better leave the question open until we appeared in the royal presence.

The king's
answer.

March 16th. — My messenger returned, and was brought to me by the viceroy in state, whose retainers saluted me by keeping up a continued fire of musketry in the yard. After the usual prostration, he gave

me the king's thanks for the present, and my congratulations, saying —

“ That I had better take a walk and come back, *i. e.* go to sea. ‘ This moon must die, next moon die, then five days come on shore,’ or on the 15th of May.”

This morning, in my walk in the street called “ Zoh-mahee,” “ Fire-cannot-enter,” I met a chain-gang belonging to José Almeida, ready for marching to Popoe. I understood, as soon as they saw me coming, the drivers marched them in.

March 17th. — Sunday, but little differing from any other day, except in the gay attire of the liberated Africans, who, as a mark of civilisation, keep the sabbath day by dressing out in all their finery. It is the great pride of a black to be of the white man's religion ; and all, either from Bahia or Sierra Leone, call themselves Christians, and, no doubt, in the common acceptation of the term, are so. If one might so decide, they, at least, are in a happier position than when following the religion of the land, worshipping the snake, or the leopard, the

Neglected
state of
religion at
Whydah.

fetish of Abomey. Though but nominal Christians, we will not insult them by calling them pagans. The safety of their souls demands immediate and strenuous exertions on the part of true Christians. A very trifling sum from the general stock would support a chapel; and then the derision of the Bahias would not fall on their Sierra Leone neighbours, who, having a Roman Catholic church in the Portuguese fort, deride the *soi-disant* Protestants as being without the pale of their church. Nor is this the worst part of their position. The half-educated black returns in pride to his country, a *savant*, a monkey that has seen the world, to be a useful or a mischievous one as fate may decide. Those landing at Badagry meet pastors and masters, and, in all the pride of "the title of white men," would not miss the chance of attendance on prayers: those landing at Whydah—"it is but one step from the sublime to the ridiculous"—have no head, no church. A Sierra Leone African is always looked upon as a spy; and—"the last state of that man

is worse than the first" — he cohabits with women of the country, and returns in time to their and his natal idolatry.

How inconsistent it appears, that in positions where the slave trade rules, there is no missionary labour. Such places ought to be the points of honour. The "Black" priests from the island of St. Thomas preach to large flocks, and converts are frequently made. The slave trade does not interfere with them, nor do I think it would materially with a Protestant mission; and the more "Black" priests are ordained and employed in Africa, the further religion will extend. Whydah never, even in the palmy days of trade, had a Protestant place of worship. Besides the Roman church in the Portuguese fort, there are the ruins of a chapel in the French fort, now converted into a powder-magazine. I trust ere long those Africans, whom the *amor patriæ* leads to return to Whydah, may not have to give up the fruits of the labour of the good pastors of Sierra

Absence of
missionary
labour.

Leone to vitiated appetites, re-acquired for want of one to guide them.

The system
of presents

March 18th. — The viceroy sent his eldest son with his “friend’s stick,” and a present of some palm-oil and beans-cake, a sort of compliment cake only cooked for the official people. These little compliments are never properly understood until they are ten times paid for. In Dahomey all preliminaries are settled by presents, and no matter can be arranged unless commenced by a gift. It is the worst country a poor man ever travelled in, for the sprat is baited so often that the mackerel is dearly purchased — if obtained. In all semi-barbarous countries it is the same, and, in other words, visitors cheat themselves to rob the rulers of the land, who otherwise would impose upon them. “Poverty is no crime:” — a Dahoman would soon give that the lie, if applied to a foreigner.

The dis-
eases of
Whydah.

March 19th. — Disease in Whydah is a despotic tyrant, and holds a divided sway, at one time tyrannising over the whites,

at another over the blacks. Just now he is chastening the blacks, among whom much sickness prevails, while, except from a bilious fever, not dangerous, the whites are free. In June and July, he changes colour, and the whites stagger under the effects of the power of the sun or the miasma from stagnant pools of recently fallen rain. The atmosphere is pregnant with foul sinells, and the very air is tainted.

March 20th. — I have been clearing my yard, and paying labourers and servants. Talk of India ! the Indian is a happy man with his servants. Here not only will one not clean your shoes that cleans your knives, but the master, if he would have his work done, must keep on the watch and see that his orders are executed. Yet when the rates of pay are considered, Reader, you will not be astonished that they do so little. As I cannot suppose in any *endroit* in the known world labour is cheaper, I give the following list as much as a curiosity as a guide to future visitors.

Servants in
Whydah,
and their
pay.

| | Heads. Cowries. | And provide themselves. |
|---|--------------------------|-------------------------|
| Head man of under 20, or a man who measures oil, per month | - - - 6 or 12,000 = 22s. | |
| If more than 20 in a gang, 2 head men, —2nd, at per month | - - - 4 or 8,000 = 18s. | |
| House servant, per day | - - - 280 = 7d. | |
| Cooper, ditto | - - - 280 = 7d. | |
| House builder, ditto | - - - 100 = 2½d. | |
| Hammock-man | - - - 120 = 3d. | |
| Carrier of goods, if not per job | - - - 120 = 3d. | |
| Slaves are subsisted by their masters, and receive no pay ; their subsistence costs, at a liberal allowance comparatively | - - - 20 = ½d. | |

Canoe-men are of a different class, being Accras. If hired by Portuguese, and enter for two years' service, —

| | Heads. Cowries. |
|--|-------------------|
| On taking service they receive 1 roll of tobacco | = 8 = 16,000 |
| On leaving service, 10 pieces of cloth | = 10 = 20,000 |
| 10 dollars | - - - 12 = 24,000 |

and weekly for subsistence

| | |
|-----------------------------------|-------------|
| or 2d. a day and 1 bottle of rum. | - - - - 560 |
|-----------------------------------|-------------|

Canoe men hired by Englishmen : —

| | Heads. Cowries. |
|---|-----------------|
| Head man, per month, 4 pieces of cloth | - = 4 = 8,000 |
| Canoe-men, per month, 2 ditto | - = 2 = 4,000 |
| Besides, each, 560 cowries, 1 bottle of rum a week. | |

Cowries, the currency of Dahomey, are passed in fifty strings of forty each to the head or nominal dollar. It is remarkable that in all barbarous nations where money is known, the currency is decimal ! Iron

bars four to the head, rum half-a-head a gallon, and cloth form a currency dependent on the market. All gold and silver is current at a valuation, but scarce.

March 21st. — The Souza family having invited me to a pic-nic, and promised to show me a European plantation, — started at noon in hammocks, and, at a distance of three miles to the westward, found they had not exaggerated their description. A splendid palm-oil plantation was before me, thickly set with palm trees, intermixed with corn, cotton, yams, and cassada, according to the soil; the ground being undulating, — sometimes high and dry, at other places oozing and low. The proprietor was a liberated African from Bahia, originally a Mahee; and the plantation in the highest order. Arrived on the ground, we smoked a cigar under the shade of a cluster of palm trees, while the lord of the soil brought specimens of the palm nuts for our inspection. In about an hour the Da Souzas were all fast asleep on mats; presently awaking, a canteen was produced,

Pic-nic
with the
Da Souzas.

and I was asked to partake of some Brazilian rum (casash), which good breeding even would not allow me to accept. Understanding but slightly Portuguese, I began to think I must have mistaken the invitation, and felt satisfied there was some misunderstanding when the contents of another box were exhibited — some meat cooked in rancid oil, biscuit, and yams. I, with pretended *goût*, joined in the repast, and, after another cigar, gladly took a walk round the grounds, not in the best of humours, imagining that I had rather grievously mistaken the meaning of the invitation, or been well paid for accepting one from a slave-dealer. By a circuitous path, we again came to the palm copse, now like the oasis of the desert, a welcome spot. The charm of Aladdin's lamp could not have wrought a greater change: a milk-white cloth was spread on mats, and was now covered with every delicacy — wines of France, Spain, Portugal, and Germany; whilst every article, even to the coffee cups and saucers, was of solid silver.

March 22d. — The king's messenger arrived to-day, to summon the Da Souza family to Abomey. The ee-a-voo-gan goes also. Domingo Martins declines the invitation. The object is to choose a cha-cha from among them. Isidore has the money; Ignatio is backed by Domingo Martins, who has great power with the king; and Antonio is the king's favourite: thus the king has to choose between wealth, power, and friendship. What will the black Napoleon, the destroyer and maker of kingdoms, do in this emergency?

March 23d. — Having become acquainted with, I was going to say, every stone—but there are none!—in the Whydah roads,—with every tree (the finest of which, by the by, is a noble structure of nature, the fetish tree, a huge cotton giant of the forest, on the Abomey road),—I threw myself into my hammock, and, falling asleep, awoke at Savee, from whence I took a long walk, and returned in the evening.

March 24th. — In describing the two palm-oil plantations, I think I have gone

The choice
of a cha-
cha.

Agricul-
tural pro-
gress in

Whydah — burning of the grass. to the extremes ; but the Whydah people are justly famed for their agricultural pursuits. Just now all the country is in a blaze — the dried, high, grass is burned, and the ashes left for manure ; while, at the same time, the burning element destroys the overgrown animal and reptile kingdoms, and rarefies the atmosphere. When the land is under cultivation, it has the garden appearance of Chinese agriculture.

Customs duties at Whydah. *March 25th.* — Why I know not, but it is a fact, that all appear ashamed of the custom duties they pay his Majesty of Dahomey. Ask the British agent! — as well have asked Ananias for truth. Ask a Portuguese, and you touch his risible faculties — you fairly make him laugh. A return, therefore, it would be impossible to give. I do not think the duties on legal trade sufficient.

Preparations for departure. *March 26th.* — Presents in Dahomey are looked upon with a jealous eye. At this time, to embark my present for the king would be suspicious. There was only one course. Feeling certain in my own mind

that I ought to return, I resolved to leave the "present" with the viceroy. Accordingly I received a receipt from Dagbah, the viceroy (*Anglice* Calabash, the most useful of vegetable African productions), and prepared for embarkation.

March 27th. — Even Whydah has its attraction. I am almost imagining myself sorry to leave it. The English town-people are my sworn admirers, and yet I have employed only a few of them. 'Tis pleasant to live beloved, even in outward show; and there appears a good deal of that with these Whydah people. I tell them I am going: they only hope some government officer (could it not be yourself?) would be sent to govern the fort. They have remembrances of happier days when they had a definite master: now they are everybody's servant. Well, be it as it may, liking or disliking, I shall be sadly disappointed if I do not return.

March 28th. — The great drawback to trade in Whydah is the frequent inaccessible state of the beach, at all times unap-

The beach
at Whydah.

proachable except in the Accra canoe for trade goods, or the Kroo canoe for messages. Sometimes for weeks the beach is closed. All goods shipped for Whydah should be hermetically sealed, if possible. The other difficulty is the distance of the town from the beach and the intervening lagoon.

I experienced much difficulty in the want of a canoe, and generally overcame it, when I wanted to forward a letter, by one of the boats of Her Majesty's ships coming to the edge of the surf, and a Krooman swimming to and fro with the despatch.

March 29th. — Visited the viceroy, who begged I would not be far away, in case the king should send for me. Told him that I intended going to the Island of Ascension, and would be back at the time appointed; which he begged I would, as the king might imagine some mistake had arisen, and hold him responsible for my reappearance.

My house
and land-
lord.

March 30th. — Received presents of fowls and goats, &c., from a number of blacks who had become acquainted, and

had been in the habit of calling on me. Sent all my traps to the beach. My house deserves a remark. As usual, Madiki, considering himself a rich man, has a large enclosure, while, on the other hand, as an "ee-ah-voo," he could not do less than have a white man's house. He owns ten slaves, and has a large plantation. From the estate he cut timber, and the slaves fashioned it; they next dug the clay, and made what is called the "swish," which is mixing the red clay with water and straw to make it more adhesive: and of this all houses are built in Whydah. Then they set to work and built a house, thirty feet high, eighty long, and forty broad; having in it three principal and four small rooms, besides two verandahs. They next cut the dry grass, and thatched it; then procured the oysters from the lagoon (probably subsisted themselves on the natives), and with the shells whitewashed the building. The whole was done in a year, and is well worth the value of the slaves (who all the time were subsisted from the plantation);

not costing the proprietor a halfpenny. My argument with him was (and as my interpreter he might have made good use of it), Do you not see the value of labour? Had you sold those slaves the money would probably now be gone; now you have the slaves and the money too — all in one year, and every year you might so increase them in value. He saw it, but did not think the king could, as, how was he to commence? It is the commencement that is wanted. This house is of no personal use to the owner, so he is glad to have a tenant.

Embarkation and departure.

March 31st. — Embarked on board Her Majesty's Ship Bonetta, and proceeded to the Island of Ascension, to join the commander-in-chief, and receive instructions for my future guidance.

REFLECTIONS
ON
THE SLAVE TRADE
AND THE
MEANS FOR ITS REPRESSION.

SIR JOHN MALCOLM, in his Embassy to Persia, comments with approval on a remark by an old naval master, when speaking of the subjects of the Imaun of Muscat. "Manners," said the master, "they have none, and their habits were disgusting." The reader will already have been able to judge, would this not form a concise account of the manners and customs of the Dahomans. I account myself as fortunate in not being the pioneer in depicting the extraordinary court of the most warlike of African slave-hunters, — a monarch whose

whole existence depends upon the slave trade, whose every exertion is to supply a larger number to the market of the preceding year, — a monarch whose power is almost absolute, directly and yet indirectly so extraordinarily balanced that, to use a common expression, his head is not safe for a twenty-four hours' insurance.

The Daho-
man ama-
zons.

It is rarely that Europeans are called upon to believe in the existence of amazons, — fighting women prepared to do battle on all around, the terror of the neighbouring tribes, dressed in the attire of male soldiers, armed with muskets and swords. These sable ladies perform prodigies of valour, and not unfrequently, by a fortunate charge, save the honour of the male soldiers, by bearing down all before them, discovering themselves to be women, exceeding their male coadjutors in cruelty and all the stronger passions.

Excited by the hopes of reward, the evil passions of man are fearfully developed in Dahomey. Blood-money is the sure reward

of valour, the price of blood the only fee ; and it matters not if the prisoner is brought alive to the monarch, as his reeking head is almost equally valuable. Without a trophy, such as a prisoner or a head, the soldier had better have been killed ; disgrace, and often condign punishment, follow to the defaulters of either sex.

There is not a more extraordinary army in the known world than that of the military nation of Dahomey. The nucleus of the national power, the throne, is occupied at the pleasure of the militant people, who claim an annual war as a birthright. If, from want of courage, or any other insufficient reason, the monarch dares to dispute the will of his people, he, who could by serving the vitiated appetites of his soldiers have taken the lives of any, high or low, is as surely dethroned and murdered.

In speaking of the two armies, let not the sensualist imagine that a Dahoman campaign is disgraced by a freedom it would

almost be natural to suppose to belong to so curiously disposed an army, half male half female. On the contrary, the latter are in charge of eunuchs, officered by their own sex, and scorn the softer allurements of their nature. To use their own words, “ they are men, not women ! their nature is changed ! they will conquer or die ! ” Such expressions could not be openly used, even as mere boasts, by women standing in a jealous position, emulating the most daring acts and achievements of man, unless fundamentally true ; and with the certainty of being openly contradicted, and brought to shame, by their fellow-soldiers of the opposite sex. Such then are the amazons, in whose chastity we may believe, when we bear in mind that the extreme exercise of one passion will generally obliterate the very sense of the others. The amazons, while indulging in the excitement of the most fearful cruelties, forget the other desires of our fallen nature.

Superstition assists in the preservation of the chastity of this most singular army.

The amazons are accommodated within the precincts of the harem walls, and when abroad share the honour of royal wives. The bell announces to the traveller that he must not gaze on them ; and thus they have not much opportunity of joining in conversation with the opposite sex. On the thresholds of the royal portals a charm is set of so determined a nature as to render *enceinte* the offender religiously believing its existence. The frail amazon not infrequently sickens, and confesses the seducer's name, though fully aware that the decapitation of herself and her lover is the immediate result.

Rank, to a certain height, in the army, is obtainable by merit ; but beyond that there is no means of rising except as a speculation, keeping a regiment and volunteering their services at the annual hunt ; all the higher ranks being hereditary.

The great bearing aimed at in giving these Journals publicity, is to offer to the reader an opportunity of judging for himself of the fearful state to which the slave

trade has arrived in that portion of Africa of which Dahomey is a kingdom, and of the extraordinary innate civilisation which exists among the blacks, and which, if worked upon, would considerably ameliorate the condition of the African. It is a country of remarkable contrasts in its customs and manners. For the price of one dollar the grand vizier will decapitate an unoffending prisoner of war, whilst the more civilised viceroy of Whydah, who from commercial intercourse proves the power of example, will pay one fourth of that sum to public functionaries to undertake the fearful office. And yet the same high officer studies and understands an etiquette that would do honour to the most civilised courts in Europe, and renders the courtier himself (if divested of the disgusting ancestral habits) a gentleman of nature's mould. It may seem singular to the general reader, that the prime minister's office should be that of headsman, but such is only consistent with the early histories of many European nations, and, together with many

of the appointments about the court, proves that the court of Dahomey is much upon the same standing that those of northern Europe were before the light of civilisation shone upon them, and discovered their evils and nakedness.

How many schemes are and have been offered as infallible destroyers of this fearful evil, many in the main correct, yet differing sufficiently as to render them apparently opposed! All men of education must be moral haters of the iniquitous traffic; but it is not always that education can carry a man's ideas above the advantage of his own interest; and no doubt the interests of this country—I mean the monied interest of the manufacturing portion—are for the time better answered by the existence of the slave trade than they would be by its repression. Such, however, would not be the case on the consequence of its failure, and the rise of legal trade, the extension of commercial intercourse, the civilization of Africa. The multiplicity of wives enjoyed by the king

The slave
trade and
the means
for its de-
struction.

and his officers, and the selection and separation of thousands of virgins as amazons, leave but few females wherewith to increase the population ; whilst the hundreds of thousands of skulls that ornament the palaces, the annual introduction of 60,000 slaves into Brazil, at an exportation of at least 180,000 from Africa, unite in tending to decrease the numbers of the people rapidly, and thus render the demand for manufactured goods, or, in other words, for trade, less than it would otherwise be. Look at the method employed to feed this traffic. A war of extermination is decided on by a giant army on an unoffending town. We all know by histories of recent wars with civilised troops what are the horrors of a protracted siege, or of the excitement incidental to a mortal conflict. How can we wonder then at the fearful tragedies constantly enacted by the Dahoman armies, when the price is honour or disgrace ; a head or a prisoner, or to be publicly spat upon by some self-lauding amazon in the ensuing council ?

These wars are directly and instrumentally the acts of the slave-merchants of Whydah and its neighbouring parts; but have they no higher parties on whom to lay the blame of their actions? are these, the agents of larger houses, the instruments in the hands of parties who have other means of disposing of their goods, to bear the whole blame? Truth is strange but a truth it is, that the slave trade is carried on in Dahomey and the neighbouring kingdoms with British merchandize, and, at Porto Novo, the residence of the monarch of slave dealers, by British shipping direct. I do not mean to say that if British goods were not obtainable, the traffic would cease to exist; but the taste for British goods runs high, and if these could not be purchased with slaves, palm-oil would be manufactured to obtain them.

Thus the discontinuance of trading with the slave ports would afford most important aid in the reduction of the horrors of the slave trade. Except with the natives for palm-oil or other native produce, the system

Disecon-
tinuance of
legal trade.

of trading with the interior kingdoms is in pawns, or domestic slaves, saleable on the sea-coast to the highest bidder. But with these pawns a dawning of civilisation has illustrated that the African is not even by nature the brute he is generally believed to be. Should the pawn become a parent, neither the parent nor the child can be forcibly expatriated.

The blockade.

It is by no means impossible to stop the slave trade, but the means to be employed must be unceasingly applied. Blockade is one of the means, a portion of one system ; and, by its increase and the adoption of steam, a mighty one. Under the term blockade, I include the whole coercive actions of the British fleet against the Brazilian slave trade, whether on the coast of Africa or Brazils. But the blockade, as it was two years ago, with one third more extent of coast, and more than a third less in number of vessels, only a small portion of which (in comparison the opposite) were steamers, was a very inefficient organ of an unconnected system,

that left it obvious to those most interested, that it would be almost impossible to check even a contraband traffic open to so extensive a demand.

The blockade is a great, though only a portion of the system that might and would overthrow the slave-trade. As now worked, with increased efficacy, the blockade renders the price of slaves high and the market precarious. But the slaves, already so dear in the Brazils, might be rendered considerably more expensive by the withdrawal of trade from the slave dealers, and the prevention of the sale of slave-grown produce in this country, and by enacting treaties of commerce with the chiefs themselves ; thus bringing into the market desirable articles of trade, requiring the extension of labour to produce, and consequently pointing out to the naturally cunning African monarch, that in order to be rich he must increase the number of his subjects, and not sell the source of his wealth, the labour of his people.

One third at least of the extent of the Social and

moral or
coercive
conquest.

slave coast has been already conquered by civilisation and legal traffic, and it requires perseverance alone to reduce the remainder. All the high roads to Central Africa, the Delta of the Niger, of which I count the Benin, the Cameroons, the Calabars, &c., have submitted to the laws of civilisation, and the inhabitants scout with disgust the idea of selling their fellow-men. Nor is this all; the heathen superstitions of the land are fast receding before the steps of Christianity. Between this Delta and the other portions of reclaimed Africa, Liberia and Gallinas, is the extent of coast of which Dahomey is the central and all-powerful kingdom, open to social and moral or coercive conquest, or both. The former would effect its object by intercourse and trade together, aided by the morals and example of the settlers and traders; the latter would exact treaties requiring the expulsion of an evil at once disgraceful in the sight of God and man. The two means of conquest, if combined, would first destroy the evil, and then set up such a de-

mand for the produce of the land as would, as it has in the rivers above quoted, render it impossible that the slave trade should ever again offer its present powerful temptations. The lovers of peace may quarrel with the term coercion, but in its African sense there is no display of military discipline. Those portions of Africa whose inhabitants have seceded from the slave traffic have done it partly from coercive measures, and partly from moral effect ; but the former measures have been simply used to the foreign slave-dealer, and the latter to the native, whose benefit has been materially studied, although perhaps not satisfactorily so to his grasping nature as at once to be developed.

The material argument against such coercion as was lately enacted on Gallinas is, that life is unsafe. I do not look upon Africa as the deadly continent it is the fashion to describe it. Men enter Africa determined to have fevers ; and, like the phantom's story in the Persian fable of Cholera, fear kills them. Less cant on the

subject of African diseases would materially assist to stop the slave trade, and render African enterprise more genial.

The moral course.

That the stoppage of trade (all trade) would in a very short time put an end to the slave trade, the following journals will illustrate. Even the proud king of Dahomey succumbed to a threat, and, while his sycophants cried night and day, "Oh, king of kings!" gave up three prisoners, in fear of the consequences, when I threatened to stop his trade. The crusade against the slave trade is a holy one, and should not be abated one iota. Differences of opinion as to the best methods to be pursued, there must be, but undoubtedly the one most true will be that which calls for additional sacrifice on our part, and increases the difficulties to the Brazilians, by raising the price of their favourite commodities. Coercion alone cannot stop the slave trade; indeed, I much doubt that, if unassisted, coercion be not a mere blind, a phantom, a shadow, wanting the substance to make it tangible, increasing horrors without alleviating in

any way the condition of the African ; and such, up to a very late period, has been the extent of operations actually brought against the slave trade, not, as now, when the system is strengthened by treaty, trade, and the advancement of civilisation. These three constitute the moral course whereby to check this great evil, which, with its physical auxiliary (assisted by treaties as well with the Africans as with the Christian powers), will in time crown with success the most philanthropic undertaking ever entered into in this world.

The Africans are by nature great traders, and require this habit to be encouraged. If not supplied by legal trade, the mercantile traffic in slaves occupies their attention. Of this trade there are several classes, the highest of which is that of Dahomey, which, in a warlike view, has an approach of honor in it. In the ancient feudal times the prisoners were detained until ransomed, the conqueror deeming he had a right to enrich himself by his prisoners; but in Dahomey there are no na-

African
love of
trade.

tives to ransom, and the Dahoman war becomes a war of extermination, and with the conquest falls the very name of the kingdom, never more to be revived. The more degenerate are those that have been easiest uprooted, and probably less lucrative to the gamblers—the sale of relations. Strength ever predominated, and the father either sold his son in his boyhood, or ran the risk of age changing the positions, when the son, now the strongest, bound the father and sold him to foreign slavery. Such scenes are even now at times enacted in South-western Africa, but the laws of Dahomey forbid such an unnatural sale of human beings.

Of all the nations of Africa, the greatest traders are those lying east and west of Dahomey; the Akoos on the one side, and the Kroos on the other. The Akoos are the Jews of Africa, and have several very rich representatives in Sierra Leone. The Kroos are the Gallegos, and prosper in parts where the natives starve, by undertaking any kind of labour, and performing it well.

There is no reason why labour should not be introduced into the central position, or that the neighbours of the Akoos should not learn the value of accumulating wealth.

With the Delta of the Niger on the east, and Ashantee on the west, Dahomey may be said to lie between the two grand pillars of the dethroned slave traffic. While in Dahomey silks are seldom imported, and nothing but the refuse of the market, greatly increased in price by the additional duties and freights of a voyage and landing *via* Brazils, is found in trade, it is far different with her neighbours. The most choice articles are selected, silks of India and China, corals of immense value, champagne and all the higher wines, silver and gold ornaments; in short, all the higher order of trade in its perfection is to be found on board some of the largest trading ships in the world, in the Bonny and its neighbouring rivers, in order to be exchanged for palm-oil.

The Liberian people are doubtless held up as an example to the general state Liberia and its slavery.

of the African, but I prefer not instancing that state further than to prove I have not overlooked it. For in Liberia there is as much, if not more, domestic slavery — that is the buying and selling of God's image — as in the parent states of America, over which flaunts the flag of Liberty (?) It is difficult to see the necessity or the justice of the negro who escapes from slavery on one side, crossing the Atlantic to enslave his sable prototype on the other, yet such is the case: and so long as it lasts, notwithstanding the attractive reports that emanate from this new republic, it cannot be held as an example of future good, but, if possible, should be remodelled, even if at the expense of internal revolution, or even total annihilation. I doubt if many benevolent Christians in this country are aware, that the model republic is, in reality, a new name and form for slavery in enslaved Africa, and, until the system be altered, totally undeserving of the high support and liberal charity it receives from the benevolence of Englishmen.

The system of domestic slavery is by no means confined to the Liberian portion of civilised Africa. Pawns (as the fashion terms the slaves on the Gold Coast) are received and held by Englishmen indirectly, and are to all intents and purposes their slaves. The plan adopted is this: the merchant takes unto himself a *femme du pays*, and she manages his establishment. Nor does he inquire how she hires his servants. Her mode is to accept pawns, *i. e.* purchase slaves, by receiving man, woman, and child in liquidation of debt; in other words, selling goods to native merchants, who, for convenience, leave slaves in payment. These pawns are as directly slaves to their master as any slaves in the United States, but cannot be sold out of the country. I myself am aware of one *femme du pays* of a British merchant being the owner of forty pawns, who perform the household and other services of the master, and are, except in name, his slaves. His money purchased them, and they obey his commands on pain of corporal punishment,

The system
of pawns.

and draw him to and fro in his carriage when taking exercise. How far is this removed from actual slavery ?

*Education
in Africa.*

The general reader may be astonished to find introduced in these pages a discovery of a written African language, of the Phonetic order, arranged entirely by a few natives of Vahie, by no means perfect, and extremely extensive, having upwards of 200 characters ; it is no less a matter of wonder emanating from enslaved Africa. Education is a favourite pride of the African, and there are few in Sierra Leone, who have been brought there young, but can read and write. Men of eminence are now expounding the Gospel in their native languages, as ordained clergymen of the Episcopal Church, whose early sojourn and troubled life was passed in the lottery of foreign slavery. The most distinguished of these, the Rev. Mr. Crowther, chief of the Church Mission Society of Abeahkeutah, has translated the Gospel into several African languages. The return of such men, in the advanced state of education neces-

sary for an ordained clergyman must tend materially to civilise their relatives and fellow-countrymen.

Instances are constantly occurring, illustrating the extraordinary capacity of the African mind. The island of St. Thomas sends forth hundreds of black Roman Catholic priests to many parts of Africa, and these sable fathers assist materially towards the great object, the civilisation of Africa. Acting, however, under the protection of the Portuguese government; the known connection of that people with the slave trade prevents the fathers from being often heard of out of the scene of their labours. The richest slave-merchant resident in Whydah, Don Jose Almedia, is an ex-slave, sold from the very port of Popoe, in which he now commands a monopoly. This remarkably clever shrewd man was educated in the Brazils, during the period of his slavery in that country.

Capacities
of the Afri-
can mind.

If from each great slave state a selection of youths were made, educated in professional rule as clergymen, doctors, agri-

culturists, and artizans, these, returning to their countries, would soon assist civilisation and generate a contempt for sacrifice and slavery. The extraordinary contempt an educated black has for his unpolished neighbour is inconceivable, and it is the pride of all to attend Church-meetings to prove their education (not to mention a weaker pride of exhibiting their finery). These foibles, worked upon, studied, and humoured, might be rendered eminently serviceable. What the African particularly requires is example; for, be it good or bad, he will follow it if set by "The white man;" by which he means men of any colour, but educated. To such an extent is this idea carried, that the candidates for the police lists of Sierra Leone were very extensive; and on inquiry it appeared, that to be a policeman was at once to be a white man, *i. e.* to be removed from the epithet of "Nigger," associated with that state of semi-barbarism in which the black looks upon his neighbour. Such is their taste for finery and improvement, that I do not

suppose a finer-looking, or better-dressed body of militia exists than that of Sierra Leone. On a Sunday, in Sierra Leone, the churches innumerable are filled with well dressed, and even handsomely dressed, congregations, listening to discourses of sable ministers, I merely instance this to show what may be done by introducing education generally, and not to recommend the present system of negro preaching, which most assuredly requires supervision. So far does education interfere with the slave trade, that if a man spoke only a few words of English, he would be gladly turned out of a barracoon, being deemed by his unlawful master an educated and dangerous man.

There is one last and strong reason why a conquest of slavery should be effected by moral, rather than physical force, and tending to prove, that civilisation must precede any decided check unassisted by education. The slave-hunting monarchs claim an equal position with Great Britain as the greatest of white nations. How often have I been told in Dahomey, " You

Necessity
for educa-
tion before
coercion.

make war on the Portuguese and beat them, we on the Attapahms and others with equal success. "These," said the mayo, pointing to two tumblers on the table, "are alike in size, in make, in shape; this is Dahomey, that England See, I turn round, and looking again I cannot distinguish; they are coequal, the greatest white and the greatest black nations. Your queen can conquer all white nations, Gézo can take all blacks." Such is their idea, gathered from the reports of the slave-dealers, who cause them to believe that we are a nation of pirates,—water-gods, in short. But, though feared for our power, we leave no moral impression upon the natives, by plundering, as they imagine, our Portuguese and Brazilian neighbours. All that we arrive at is, that the highest nation of Africa owns a respect, which may be also termed a fear, for the nations that can do to the whites what they can do to the blacks. What is wanted is education, 1st, to give the African an idea of the great moral force intended, at an enormous expense, to free him from the

chains of foreign slavery, and to cause him to believe (what in his uneducated state he has no conception of) that Great Britain dispenses an enormous sum to effect that object. 2nd. To enable him to understand the sacrifice he is making in selling labour from a country capable of providing for four times its population. 3rd. To put a stop to the fearful sacrifices of human life, and the devastating wars consequent on the slave trade.

Having prepared the African mind, the slave trade could not exist, even on demand from the Brazils, as, if the kings of Africa forbid the embarkation of slaves in their territories, the slaver could not trade, the slightest delay on the coast would be fatal, and the slave trade at an end. The measures recommended here may appear to require much time to develope, but such would not prove the case if once set in force. That the slave trade will be put a stop to without educational assistance, may be possible. Experience, however, seems to combine in proving the improbability of such a result.

THE ANIMAL KINGDOM.

THE animal kingdom of Dahomey is very extensive, not only in variety, but in the dimensions of the animals themselves. The elephant, lion, leopard, range the forests in company with lesser brutes, while the hippopotamus and alligator render the approach to rivers and lagoons at least dangerous to the unarmed wayfarer.

I cannot, like my contemporary in South Africa, enter on a sportsman-like description of the " wild sports of Dahomey," yet it will perhaps appear novel, as I believe it has not before been published, that in this extraordinary kingdom the softer sex, besides being warriors, are also the enemies of the fiercest and wildest animals of the vast forests.

In most semi-barbarous states, the fiercest animal of the forest is by no means so dangerous as the idle and wilful man, who, fearing no law, ranges the jungle at war with his fellow man. Against such desperadoes the king of Dahomey guards his subjects, by decapitating on the spot the murderer or thief, and ornamenting the nearest tree with the ghastly skull — a warning to his fellow ruffians. As in India, a white flag marks the spot where a human being has been destroyed or attacked by a tiger. These remembrancers cause a momentary shudder, but give promise of protection to the traveller.

The elephant of Dahomey is of immense size, and is held, like all the large animals, in religious awe. On certain occasions, or the grand festival, the flesh of the elephant is eaten by the king; and distributed by his majesty to the highest of his subjects.

Two regiments of amazons are styled rangers of the forest, and one part of their duty is to supply the elephant-flesh for these feasts, and the bones and skulls for

The Elephant.

the fetish houses, while the tusks and teeth are sold to the merchants at Whydah.

The elephants are never far distant from water, which in the dry seasons is only to be found in the extensive marsh before described ; and here the amazons generally succeed in shooting them. So scarce is water in the dry season in Africa, that, in parts of the Mosambique, the tusks of the elephants are obtained at the price of human life. When the large swamps become partially dry, with the remains of moisture towards the centre, to endeavour to alleviate the painful torture of thirst, the elephant strays so deeply into the morass that his strength fails, and, unable to return, he dies. Well aware of this, at certain seasons the Portuguese merchants oblige their slaves to dig for ivory in the swamps, and thus not unfrequently the diggers are destroyed by the gas of the marsh, and fall victims to the avarice of their masters.

Under the charge of a eunuch, but immediately under command of an amazon

officer, a party sallies forth, armed with muskets and bush knives. Arrived at the marsh, they succeed in herding a number of elephants, and, having selected the youngest, they surround and shoot them, seldom missing their aim, nor shewing the slightest dread of their formidable opponents. The selection having been made for the festival, the meat is cut up and sent to Abomey, while the amazon chasseurs employ themselves in killing for their royal master's emolument. They have no idea of entrapping the elephant, nor will they be taught.

The late Mr. Duncan having a commission from the Royal Zoological Society, endeavoured to interest the king of Dahomey to obtain him a live elephant. Such a thing was impossible. He could understand the elephant falling into a pit, but to get him out and lead him he could or would not believe possible.

The lion is oftener heard than seen in Dahomey. Now and then, in the neighbourhood of large fetish houses, and in the *entrées*

The Lion,
Leopard,
and Pata-
koo.

of the palaces, the skulls and jaw-bones of these royal beasts are found. In consequence of the number of wild beasts, all cattle are housed at night; and, unless on very especial business, no man travels after dark. Uninterrupted they prowl about even within the streets and yards of the towns and villages, sometimes, although very seldom, enticed by the odour of a dead carcass into a trap. The carcass is divided among the friends of the lucky owner; the skin sold at Whydah; the teeth become the most valuable of ornaments to both sexes; while the skull and bones are a well-received offering to the fetish, and gain for the donor no slight privileges. Of higher value are the portions of the leopard, the fetish of Dahomey. The law does not forbid the killing of these sacred animals, but ceremonies have to be gone through with the fetish people, that render it an inconvenience to the matádor, which he will not incur a second time if possible; nor is the leopard often killed, except when he falls into the trap intended for the more noble wanderer, the

lion. Should man fall a victim to the leopard, in the belief of the Dahoman he is gone to the land of good spirits ; and, far from endeavouring to revenge his death, his relations will if possible feed his devourer. The only other carnivorous animal of any size is the African wolf, the patakoo. These animals are very bold, entering the very squares of Whydah, and often attacking children, I have seen them under my hammock, eating the bones left from supper, while sleeping in the verandah of a house at Torree. They have a fearful howl, and are generally in flocks, snarling and fighting after their prey. No wall is high enough to deter them, although to a certain degree they are cowardly. The native boy, if within hearing of the patakoo, will, to insure safety hold an article of clothing or piece of wood over his head to make him appear larger. These animals are often trapped, and their teeth used as ornaments, but seldom shot except by the amazon bush-rangers. Wild cats are numerous and de-

structive to poultry, &c. Monkeys of all sizes dispute the more lofty and thickly wooded portions of the forest with birds of the most beautiful plumage; while snakes of every size and various formation dispute the lower with every description of reptile. A tropical forest is all life, animation, and strife; and no sooner is life departed from one of the larger inhabitants, than the lion, the leopard, and the wolf may be seen feasting side by side, while the turkey buzzard and the monkey now and again steal smaller portions from the feast of their dread enemies.

The White
Ants and
Locusts.

The most striking and extraordinary things met with in an African forest are the ant-hills, standing sometimes eight and ten feet high, in which are miles of passages and millions of cells, stores of food and heaps of eggs; nothing can be more ingenious, nothing more curious. One family of ants, the bug-a-bug, is of the most destructive order: there is nothing they will not enter and destroy that is left on a ground floor; but as they never reach

above, casks and furniture are placed on raised platforms. Of all the animal creations in Africa the most destructive are the ants. Swarms of the white ants migrate in more terrible form than the locusts, which are also a curse of Dahomey; for while the locust is graminivorous, and remains without the doors of dwellings, the ant defies all hinderance, and, entering even the key-holes, is omnivorous. As in most tropical countries, the very air is alive. Butterflies of the most beautiful hues form the most pleasing of the insect kingdom; while, in the wet season, the European is almost maddened by the effect of the poisonous bite of the mosquito, scarcely more annoying than the unharmonious buzz of these amphibious gnats. That the bite of a mosquito is poisonous to certain constitutions not a doubt can exist. I myself have known two instances in each of which a limb has been lost by irritating the bite of these obnoxious mites.

Snakes.

The boa constrictor does not grow to a large size in Dahomey, nor are they of a dangerous description. Among the many species of reptiles the cobra capella is the most dangerous. Yet although we consider the bite of the cobra deadly, the native has an infallible cure for it, but those who are initiated are jealous of their knowledge. One of my hammock-men had been bitten three times, and his father was a doctor. Walking one day through some long grass, I pointed to his bare legs, and hinted at his danger. "None," said he; "my father picks some grass, and if, on the same day as the bite, his decoction is applied, the wound heals at once." Strange as this may appear, it did not seem so to me, having witnessed the fights in India between the cobra and the mongoose. The cobra has always the advantage at first; and the mongoose, apparently vanquished by the deadly poison, is no sooner bitten than he retreats as far from his enemy as possible, but on devouring some small herb which grows wild, and is easily

found, he revives, renews the attack, and conquers.

The bite of the whip-snake is here deadly as elsewhere. Centipedes, millepedes, scorpions, tarantulas, &c., fill up the host of reptiles, and from the constant communion one is surprised that he escapes.

The parrot is by far the most extensive Birds. of the feathered tribe, from the grey parrot to the beautiful green love-bird. In plumage the variety is most extraordinary, and, as they flit in the noon-day, the gaudy beautiful colours add to the grandeur of the scene. By the margins of the lakes and swamps are seen the stately storks, the cranes, the curlew, the pelican, and the prince of African birds, the crown bird. On the broad calm waters are wild ducks, teal, and widgeons; soaring aloft in the neighbourhood of towns, the turkey buzzard and members of the eagle tribe, to both of which a superstition is attached by the natives—a certain dread of consequences if destroyed—enforced by the government in order to retain these useful scavengers.

Fish.

The waters are by no means less inhabited than the land ; and while the inaccessibility of the sea renders the productions thereof of difficulty to the Dahoman, the inland waters are prolific in the extreme. The hippopotami and the alligator are to be seen basking on the banks of the large lagoons, instinct leading them to the deeper parts, in which they ever hide from the sight of their common enemy man. But in Central Africa the wanton destruction of the works of God is happily no part of the nature of the native : that enigma, the fetish, appears a patron to all wilder animals and forbids their destruction, while the African is a friend to all the weaker kinds, and fond of domesticating all kinds of birds and animals. Thus it is perhaps that but little fear is entertained for the wilder beasts, and perhaps from not appearing in opposition, accidents are of rare occurrence. I remember seeing a huge brute lying on one side the lagoon at Popoe, and inquired of the Kroo of my canoe if there was any danger to a party of black urchins

who were bathing on the opposite side. None he told me: once, indeed, but a long time ago, a boy's leg was bit off! The hippopotamus will never attack a man, and remains a harmless inhabitant of the lagoon so long as he keeps away from the cultivated portion, which, for his own safety, taught by instinct, he rarely visits. The lagoons swarm with fish, shrimps, oysters, and add considerably to the delicacies of the Why-dah market. The Dahomans are good fishermen, and not bad shots, yet they could teach the more enlightened Christians a lesson in sporting. Few, if any, of the denizens of the field, the forest, or the water, are safe from their guns and their fishing-tackle; but, when they take the lives of the brute creation, it is not for the miserable satisfaction of destroying numbers or merely proving their prowess, but solely to satisfy the imperious demands of nature or custom.

RELIGION, ETC.

THE civilised state of a nation may be judged of by its religion — from the simplicity of its doctrines and the absence of all enslavery of its communicants. The reformed Catholic religion is the faith of the most enlightened nations (portions of every quarter) of the globe. Compare these with the followers of Confucius, the believers of the incarnations of Buddh, or the more numerous worshippers of the prophet Mohammed ; it is the comparison of light and darkness. Yet in all religions there are some familiar forms which render them not so absolutely distinct to the semi-civilised, as to be observed without a long course of teaching.

Buddhism

Confucius foretold that a Prophet would

arise in the West, and the Chinese hearing
that a holy religion had been established
in the neighbouring continent of India,
sent ambassadors, who brought back the
Buddhist rubric, and many priests of the
“San Foo,” or trinity of the incarnations
of Buddh. The Jesuits, on entering China,
to propagate their faith, met this religion.
The trinity in unity, the presence of the
Virgin, the form of worship, with bell and
candle, by shorn and sandalled priests (in
priestly robes), who practised celibacy and
kept fasts and vigils, called forth the re-
marks recorded by Father Ripa, that the
Buddhist religion must have been invented
by the devil to puzzle the Jesuits. Such
an observation, emanating from an eminent
Jesuit father, needs no comment, but
proves the similarity, in outward show,
between the Romish and Buddhist religions
in those days; and although the Buddhist
religion is not even understood by the
priests themselves, who mutter prayers in
the Sanscrit, yet it rendered it difficult for
the Propagandists to prove to the Chinese
and Mo-
hamme-
danism.

that in their search for the prophet in the West they had stumbled on the false Christ, and that the prophecy of their cherished and revered founder of the moral and civil code of divine law was by a mistake perverted. The Mohammedan religion, spreading over the vast continent of Africa, is gaining millions of converts, and, agreeing with the wild and fearful fetish belief of the remainder of the inhabitants of the whole of Central Africa, in the plurality of wives and the right of retaining slaves, is welcomed far before the home truths and self-denial to be enforced by the missionaries of the Catholic faith. What the Roman Catholics may do in Africa in establishing an hierarchy there is yet to be proved; but in the land of the Buddhists and followers of Confucius, they left them a portion of their primitive belief, and admitted, in the prayers allowed for the dead, the direct worship of ancestors. The Africans practise in a ruder form a worship for the dead, attended with human sacrifices. They believe their relatives to be in

the same rank of life in the land of spirits they held in this, and as such to require wives, servants, and slaves; and to insure their comfort, numbers are immolated on the tombs, and often willingly sacrifice themselves to join their lords in the other world. In common with most barbarous nations, such is the belief of the world to come in Dahomey, and it is one reason for the continual fearful sacrifices.

As has been stated in the accompanying Journals, the fetish or imaginary god of Dahomey is the leopard; and the skin and head of this fetish are the king's by right, should one be killed, but woe betide the killer, better had he murdered a fellow-being, as in punishment he is sacrificed to the offended deity. This animal (under the name of paugh leopard), the "voo doong," or fetish, represents upon earth the supreme or invisible god "Séh," and, in common with thunder and lightning, "Soh," and sundry wooden images, is worshipped by the ignorant Dahomans.

The Fetish
and its sac-
rifices.

The sacrifices are various; if of a bullock

it is thus performed. The priests and priestesses (the highest of the land, for the Dahoman proverb has it that the poor are never priests) assemble within a ring, in a public square; a band of discordant music attends; and after arranging the emblems of their religion, and the articles carried in religious processions, such as banners, spears, tripods, and vessels holding bones, skulls, congealed blood, and other barbarous trophies, they dance, sing, and drink until sufficiently excited. The animals are next produced, and decapitated by the male priests, with large chopper-knives. The altars are washed with the blood caught in basins; the rest is taken round by the priests and priestesses, who, as Moses commanded the elders of Israel (B.C. 1491), "strike the lintel and two side posts" of all the houses of the devotees, "with the blood that is in the basin."* The turkey buzzards swarm in the neighbourhood, and with the familiarity of their na-

* Exodus, i. 12.

ture gorge on the mangled carcass as it is cut in pieces. The meat is next cooked, and distributed among the priests; portions being set aside to feed the spirits of the departed and the fetishes. After the sacrifice the priesthood again commence, dancing, singing, and drinking; men, women, and children, grovelling in the dirt, every now and then receiving the touch and blessing of these enthusiasts. Among the priesthood are members of the royal wives and children. The mysteries are secret, and the revelation of them is punished with death. Although different fetishes are as common as the changes of language in Central Africa, there is a perfect understanding between all fetish people. The priests of the worship of the leopard, the snake, and the shark, are all initiated into the same obscure forms. Private sacrifices of fowls, ducks, and even goats, are very common, and performed in a similar manner: the heads are taken off by the priests, and the altars washed with the blood; the lintels and sides of the door-posts are

sprinkled ; the body of the animal or bird is eaten or exposed for the sacred turkey buzzards to devour. The temples are extremely numerous, each having one altar of clay. There is no worship within these temples, but small offerings are daily given by devotees, and removed by the priests.

Diseases. Sickness is prevalent among the blacks, smallpox and fever being unattended by but bad practitioners in medicine. And here let me remark, that, after teachers of the Gospel and promoters of education, there is no study that would so well ensure a good reception in Africa as that of medicine. The doctor is always welcome, and, as in most barbarous countries all white men are supposed to be doctors, I worked some miraculous cures with James's powder, diarrhoea powder, and quinine, but am convinced bread pills would have answered as well : the patients believed and were cured.

If an African sickens he makes a sacrifice — first a small one of some palm-oil food. Dozens of plates of this mixture are

to be seen outside the towns, and the turkey buzzards, horribly gorged, scarcely able to fly from them. If the gods are not propitiated, owls, ducks, goats, and bullocks are sacrificed ; and if the invalid be a man of rank, he prays the king to permit him to sacrifice one or more slaves, paying a fee for each. Should he recover, he, in his grateful joy, liberates one or more slaves, bullocks, goats, fowls, &c., giving them for ever to the fetish, and henceforward they are fed by the fetishmen. But should he die, he invites with his last breath his principal wives to join him in the next world ; and, according to his rank, his majesty permits a portion of his slaves to be sacrificed on the tomb.

The observance of circumcision is as in the covenant between God and Abraham*, "that every man child among you shall be circumcised." "He that is born in thy house, and he that is bought with thy money, must needs be circumcised ;"

* Genesis, xvii. 10.

"and the uncircumcised man child, whose flesh of his foreskin is not circumcised, that soul shall be cut off from his people." No maiden in Dahomey will take to her bed a husband who has not been circumcised.

The king tolerates all religions; but in a negative manner the Mohammedan form of worship is the only strange one practised in Dahomey. But in Whydah the Roman Catholic religion is exercised by some black priests from St. Thomas; and the Reformed Church might be represented in any or all her sects. As yet there are no missionaries except the Romish. Mr. Freeman, of the Wesleyan church, visited Abomey some years since, and had more than one interview with the king, but has not since returned, nor have any other Protestant missionaries visited Dahomey. The present increased state of the legal trade in Dahomey has rendered that country open for the reception of religion and education, which combined would necessarily tend to the decrease of the slave trade. The Mohammedan religion has also a church at Why-

dah. Although there are many mallams in Dahomey, and they are to be seen in all the processions about royalty, yet, owing to the jealousy of innovation and the ignorance of the mallams, who are mostly Dahomans, and but ill-instructed priests, the Mohammedan religion has made but little inroad among this extraordinary people, who are, in religious matters, in a state of the most barbarous idolatry.

APPENDIX.

A P P E N D I X.

A.

*From the great King Trudo Audati's Palace of
Abomey, in the kingdom of Dahomey.*

Nov. 27. 1724.

SIR,—About five days ago, the king of this country gave me yours of the 1st instant, and immediately required me to answer it in his presence, which I did, though in a very indifferent manner: so that if I do not recall it, I hope you will excuse that as well as this.

As to the late conference I had with his majesty on receiving your letter, I think he does not want to make a price to let me go; for when I pressed him much to tell me on what terms he would send me away, his answer was, he did not want to sell me, I was not a black man; but, upon my again pressing him, he made a sort of jesting demand to the sum of I think 700 slaves, about 10,000*l.* or 14*l.* a head. Which strange ironical way of talking, as I told him, made my

blood run cold in my veins ; and upon recovering myself, I asked him if he thought the king of my country, and that you and the company, would think both he and I had lost our senses, should I have writ any thing like what he said. Upon which he laughed and told me not to put any thing of that in the letter ; for that he would order his head captain of trade to treat with you upon that subject, and that if you had not something very fine for him at Whydah, you must write to the company. Upon which I told him I found I must die in his country, and that I would only send for a few clothes and necessaries, which I desired he would let his people bring for me ; and he agreed to it : so that I don't find there is any other way of redeeming me than by the company's sending him a present of a crown and sceptre, which must be paid for out of what remains due to the late king of Ardah. I know nothing else but what he will think mean, being stocked with great quantities of plate, wrought gold, and other rich things ; and also all sorts of rich gowns, clothes, hats, caps, &c. He has likewise all sorts of common goods beyond measure, and gives away booges like dirt, and brandy like water ; for he is prodigious vain and proud, but he is withal, I believe, the richest king and greatest warrior in this part of the world ; and

you may depend upon it, in time will subdue most of the countries round him. He has already set his two chief palaces round with men's skulls, as thick as they can lie on the walls, one by another, and are such as he has killed in war; each of which palaces are in circumference larger than St. James's Park, about a mile and a half round.

He talks much of settling a correspondence with the company, and of having white men come here, which you must encourage him in, and tell him the way to do it, which will be to send me away; for he says he wants ships to come to some place only for slaves, and bring such things as are only fit for such a king as he. To all which I gave him the hearing, and which, if you humour, may be a great means to help me out of this wretched state. I hope my royal master will take my case into consideration, and think of the long and many sufferings I have had in their service, and what a miserable condition I am still in, as it were, banished all the pleasures of this life, not only from my wife and other friends, but all conversation in general; so that I am like one buried alive from the world, and think nothing can come near my unhappy fate, to lose my time, and spend my youth as it were for nothing in such a cursed place as this, and not

see a likelihood of getting out of it, but that I must end my days here. To prevent all which, I hope that they and you in their behalf will use your utmost endeavours by such means as are requisite for my deliverance, which I shall very impatiently pray to God to bring to pass.

Governor Baldwin promised me in his last, upon his arrival in London, he would lay my case before our royal masters. Therefore, when you write, I beg you will remind him and them thereof, and note the contents of what I now write. If any letters come from England for me, I believe either them or any thing else will come safe to my hands by this king's people. He is very willing I should have letters come to me, or any thing else. Nor will he be guilty of any mean action in keeping any thing from me, if it were twenty slaves. Neither do I believe he would detain any white man that should come here, but me whom he deems a captive taken in his wars. He sets a great value upon me, he never having had a white man here before, only an old mulatto Portuguese, which he bought of the Popoe people, at the rate of about 500*l.* as near as I could compute. And though this white man is his slave, yet he keeps him like a great caboceroe, and has given him two houses, and a heap of wives and servants. It may be that, once in two

or three months, he mends (he being a tailor by trade) some trifle or other for his majesty, but after the devil of a manner. So that if any tailor, carpenter, smith, or any sort of white man that is free, be willing to come here, he will find very good encouragement, and be much caressed, and get money if he can be contented with this life for a time, his majesty paying every body extravagantly that works for him. And then it might be one means of letting me go with a promise of returning to trade with him ; but he now says, if I go, he does not know whether he shall see any more white men, thinking they add to his grandeur ; so that if any fellow whatsoever comes up and goes down again, it will possess him with a notion, that more white men will come, and so let me go in order to encourage their coming. Or, if my little servant, Henry Tench, be at Whydah, and is willing to come to me, it may in time be much for his interest, as now, being a boy, the king will be entirely fond of him ; for though I do nothing for him, he has put me into a house and given me half-a-dozen men and women servants ; also a constant supply to maintain myself and them. If I loved brandy, I might soon kill myself, having enough of that ; also of sugar, flower, and the like. And when he kills oxen, which is often, I am sure of a quarter, and some-

times a live hog, sheep, or goat; so that I shall not starve (but this is nothing, I still want content. And when he comes out in public, the Portuguese and I are called to sit all day in the sun, only our boys are permitted to hold our kideysolls or umbrellas over our heads; but then he pays us pretty well for it, sometimes giving us two, sometimes three or four, grand cabess* a piece, and a huge flask of brandy to drink there, besides one or two more for each to carry home; so that the Portuguese and I endeavour to live as well as we can; and think it enough if we can keep up our hearts and ourselves in health. But being weary of this wretched life, sometime ago requested his majesty to put me into the hands of his great captain of war or general, give me a horse, and let me go to war. To which he would by no means agree, saying he did not want me to be killed, for that he should anon find other business for me; wherefore, he would have me be easy, and sit and see what he does: the meaning of which, I do not at present understand. My going to war was, likewise, much opposed by the aforesaid general, who al-

* Forty boges make one tokey; five tokeys one gallina; and twenty gallinas one grand cabess, equal in value to one pound sterling.

leged that, if I should be killed, it might bring a pallaver upon his head, and make the king angry with him, as thinking him to be the occasion of it. However, his majesty ordered me a horse, and told me, whenever he went out, I should go with him, which he often does for his pleasure, in a fine hammock with gilded awning and curtains. He likewise very often adjourns to some other of his palaces, which are some miles distant hence; and I am told in number eleven. In this labyrinth, I am willing to make life as comfortable as possible; but as it is very uneasy to ride a bare horse, I pray you will not fail to send me an old furniture with spurs and whip. The king has likewise desired me to write to you for the best horse furniture that is to be got at Whydah, and he will pay what you shall demand for it; likewise, a little English dog, and a pair of shoe buckles, and if you think well of it, you may charge them to me with the following things, both for the king and myself, being assured that even a trifling present will not only be acceptable from me, but very much increase my interest, whether I stay or go, which at the shortest must be very long. I therefore beg you will not fail to send me what is to be got of them, which may not only make my unhappy state a little the better, but make his

majesty conclude there is no thought of ransoming me, and so send me home in some of his majesty's whims.

If my two chests, left at Jacquin, are yet come to Whydah, I pray they may be sent to me with everything in them, good and bad: also the following things, if to be got on any reasonable terms, viz., &c. &c. [of no use to the reader, and too tedious to be inserted].

I hope you will not scruple sending anything I write for, as not having received any salary or diet-money, since I have been in Guinea. Nor would I have you admire at my sending for so many things, seeing his majesty has ordered another house to be built for me at a town he mostly resorts to when he is preparing for war, which fills me with melancholy thoughts, and looks no way like my going out of this captivity speedily.

If you think well of my agreeing for any slaves with the king, you must talk with his servants thereon, and send me a mark *, for while I am here I am willing to do the Company some service, if possible, their interest being always what I shall study to promote to the utmost of my power; but then I must have a

* Thirty-two pounds.

specie of all sorts of goods, marked and numbered with the rates, to prevent mistakes. Most of the ink you sent me being unfortunately spilt, I beg you will send me a paper of ink-powder. His majesty has likewise got from me the greatest part of the paper, having a notion in his head of a kite, which, though I told him was only fit for boys to play with, yet he says I must make one for him and I to play with; so I beg you will send me two quires of ordinary paper and some twine for that use, and a score of match, his majesty requiring me sometimes to fire his great guns, and I am much in fear of having my eyes put out with the splinters. He has twenty-five cannons, some of which are upwards of a thousand weight, so that a man would think the devil helped to bring them here, this place being about 200 miles distant from Whydah, and at least 160 from Ardah. His majesty takes great delight in firing them twice round every market day, only now that his people are making carriages for them; and, though he seems to be a man of great natural parts and sense as any of his colour, yet he takes great delight in trifling toys and whims; so that if you have anything of that kind, I pray you will send them to me, or any prints or pictures, he much loving to look in a book, and commonly carries a Latin mass-book

in his pocket, which he had from the mulatto ; and when he has a mind to banter any body out of their requests, he looks in his book as studiously as if he understood it, and could employ his thought on no other subject ; and much affects scrawling on paper, often sending me his letters ; but then he sends an interpreter with a good flask of brandy and a grand cabess or two.

If there is any cast-off woman, either white or mulatto, that can be persuaded to come to this country, either to be his wife or else practise her old trade, I should gain his majesty's heart entirely by it, and he would believe anything I say about my going and returning again with more white men from the company. I pray you will comply with as much of this letter as possible, which may be much for my interest. As to any one's coming, they need not fear his using any compulsion, having at least 2,000 wives, which he maintains beyond any black king, and suffers them to do nothing but for his own use, in his own house or palace, which is as big as a small town ; and when 160 or 200 of them go with small pots for water, they one day wear rich silk waist-cloths, called * * * * ; another day they all wear scarlet clothes, with three or four large strings of coral about their necks, and their leaders sometimes in crimson, sometimes in green, and sometimes blue

velvet clothes, with silver gilt staffs in their hands, like golden canes.

When I came here first, the Portuguese had a mulatto * * *, who his majesty used with abundance of good manners, continually giving her presents. He gave her two women and a girl to wait on her. But she dying of the smallpox, he wants mightily more to come, and says that no white body shall ever want anything he can purchase for gold. He likewise gives great encouragement to all black strangers, and is extremely kind to some Malay people who are now here.

This country is mighty healthful, lying so very high, and is daily refreshed with fine cool breezes. It is likewise extremely pleasant, having all Great Popo in view, though at a vast distance; neither are we pestered with moskетoes.

I hope I shall have a better opportunity to describe the power and grandeur of this conquering king, which has often surprised me, not thinking ever to see any thing like it in this part of the world. I shall therefore conclude my letter with a short account of that war, whereto I was an unfortunate eye-witness, and from whence I saved nothing in the world, but what I had on my back, and narrowly escaped perishing in the flames, being the fate of many hundreds; which I

had shared, had not a man hauled me over the wall of old Blanco's house, in which I was suddenly shut up as soon as the cry of war came. And were it not for that misfortune, I might had a chance to make my escape, which I suppose the king and old Blanco were afraid of; for which reason they sent to secure me. However, that house being the first they set fire to in the town, I got soon enough out to be a melancholy spectator of the ensuing desolation and destruction. Some time after I was hauled out, they carried me through the town to the king's house, where this king's general was, and though he was in a great hurry and flushed with victory, he took me very kindly by the hand, and gave me a dram, which was some comfort to me, though I knew not who he was: at first, I took him to be the king of Arda's brother, but then I admired at his face being cut*, and the house being in flames; but I soon understood who he was. When we went out, there was scarce any stirring for bodies without heads, and had it rained blood, it could not have lain thicker on the ground. Night being come, I walked among crowds of people, with the general, to the camp,

* Some inland countries do cut and scarify their faces for ornament sake.

who after giving me two or three drams, gave me in charge to one of the petty captains of war, who was extremely kind to and careful of me. The next day they brought one of my boys to me, who was Captain Blanco's son, but he being mortally wounded in the head, so that his brains might be seen, was not able to let me know what they said. Two days after, the general called me to come and sit with him and the petty captains of war, while they counted the captive slaves, which they did, by giving a booge to every one: the whole amounted to upwards of two grand cabess, or above 8000 in number, among whom I saw two more of my boys; one of which was wounded in the thigh, and the other in the knee. This accident gave me an opportunity of a little more talk with the general, who endeavoured to hearten me up, calling for a flask of brandy. He drank to me, and bid me keep the rest: he likewise offered me some pieces of chintz sletias, &c., which having no use for, refused, telling them if they found among their plunder any shirts or clothes, I should be thankful for them, being, as you may suppose, very dirty.

The people to whom my servants were captives, would never permit them to come to me without coming with them; however, the general bid me not be uneasy at that in the least, for

nothing should hurt me till I saw the king his master, who would receive me extremely well and kindly, which, indeed, he afterwards did. The general gave me a kidey-soll and hammock to carry me up in the country, which I gladly accepted of.

Having seen so many cruelties committed on the bodies of old men and women, also on such as were not able to travel by reason of their wounds and burns, &c., I could not choose but labour under dismal apprehensions, particularly the first morning, when they led me out, as I imagined, to sacrifice me, with a drum beating a sort of dead march before me, and many hundreds gathered about me, jumping and tearing, enough to rend the very skies with such a noise as would fright the devil himself. Many had drawn swords and knives in their hands, which they flourished about me, as if ready for execution. While I was calling upon God to have mercy upon me, the general sent orders to the petty captain of war to bring me to him, being retired about two miles out of the camp. His orders were quickly obeyed, and I brought to him, which put an end to my fears.

I should have given you an account of my introduction to the king, had not his majesty sent this minute in a hurry to me for this letter, which

I cannot have time either to copy or correct, as I intended. I therefore beg you will pardon tautology and all other faults. Being, with hearty service to all the gentlemen,

Sir,

Your most obedient humble servant,

BULFINCH LAMB.

B.

The Discovery of the Vahie Language and Vocabulary.

THERE is no greater difficulty not only to the traveller and the merchant, but also to the advance of civilisation and the destruction of that infamous traffic the slave trade, than the variety of African languages ; and there can be nothing more desirable than to form one phonetic written language to command all or as many of the African dialects as possible.

It will appear strange that the Africans themselves are beginning to feel the want of a written character, and in the following instance it may

surprise the reader to find that negro enterprise supplied for their own peculiar dialect the Vei Phonetic. The following is a copy of the despatch reporting the discovery.

H.M.S. Bonetta, Sierra Leone,
Jan. 18. 1849.

Sir,

It has fallen to my lot to make a discovery of such importance to the civilisation of Africa, that I am anxious my own profession should bear the honour that it may deserve.

The discovery consists of a written language of the Phonetic order.

On my arrival at Sierra Leone I did myself the honour to report the discovery to his Excellency the Acting Governor; and, at his request, furnished him with a copy of the characters, alphabetically arranged, which his Excellency purposed sending to the Secretary of State for the Colonies. In a service letter upon the subject I made use of the following expression : — “ To the Admiralty, the head of the profession to which I have the honour to belong, I deem it my duty to forward a vocabulary I have arranged.”

By his Excellency I was strongly recommended to send the vocabulary to England as early as

possible, and from him I received the following : —

“ I have inspected your alphabet and vocabulary of the Vahie language, and I have no hesitation in saying that you have made a most important discovery ; it being up to this time asserted on all hands that there exists no native African written language. I advise you not to lose a moment in making your discovery known to the learned in Europe ; otherwise, as you have mentioned the subject to several persons on this coast, you will run the risk of sharing the fate of many other contributors to the stock of human knowledge, by being deprived of the honour of your discovery by some unscrupulous plagiarist.”

The curiosity of the discovery brought people of all classes in Sierra Leone to witness it ; and among others the missionaries — to these men the more astonishing, one of their Society being a man of sound philological learning. The following is the copy of a letter I received from the senior Missionary of the Church of England, the Rev. Ed. Jones, M. A. : —

“ I am unwilling that you should leave our shores without expressing to you how deeply I feel your kindness in favouring me with a sight of your African vocabulary. I trust your most praiseworthy exertions amid the arduous duties

of your profession will lead to ulterior measures, and that steps will be immediately taken to pursue what you have so spiritedly begun, and thus satisfy all that the interests of philology and the cause of African improvement may demand. It does seem a strange thing (for truth is strange) that at a point of land within a few days' sail of us, and immediately bordering upon an American colony, it should be left to a naval officer, actively engaged in the suppression of the slave trade, to bring to light the existence of a written language previously, so far as I have any means of judging, altogether unknown. This is your just merit, and I cheerfully acknowledge it."

I have had the pleasure of receiving from Mr. Roberts, the President of Liberia, an assurance that the language is a novelty to him, and he did me the honour to request I would furnish him with a copy of the characters.

Hoping this communication may meet your approbation, as well as the good opinion of their Lordships,

I have, &c.,
(Signed) F. E. FORBES,
Lieut. R.N. commanding H.M.S. Bonetta.

To Commodore Sir Charles Hotham, K.C.B.,
Commander-in-Chief, West Coast of Africa,
&c. &c.

At Cape Mount, on the house of one of the Liberian settlers, I chanced to meet the following characters — “kó i si a wa ké mu.”* Never having heard of an African language of the kind, I inquired, and discovered them to be of a native language of late introduction or invention. For some time I failed in getting them explained, or in obtaining any further information on the subject.

A lucky chance took me to a town called “Bohmar,” about eight miles E. of Cape Mount, and there I met a man by the name of Mormorro Dualoo Wohgnae, a nephew of the king of Sugury, who possessed a manuscript and understood the language.

On this man consenting to live on board her Majesty’s ship, I undertook to arrange the inclosed vocabulary, having collected and classed all the characters his book contained.

It will be observed that the language is of the Phonetic order; that the characters are not symbolical; and, according to my teacher, it was invented ten or twenty years ago by the following eight men: —

| | Native Character. |
|------------------------|-------------------|
| 1. Duaroo-Kehloe-Kiae. | Dua du ke ra gai |
| 2. Fargan-Zapoh. | Fa nge sa gbo. |

The foregoing vocabulary is of the "Vahie" or Vei language, which extends over the following countries : — Cape Mount, Soungrie, Marma, and Gallinas, on the sea coast, and several interior countries. Varieties of African languages are so frequently met with, that they may be more properly termed dialects, as the following may prove : —

| Vahie. | Courroo. | Kroo. | Fish. |
|--------------|------------|-----------------|-----------|
| 1 Dondo | goonoo | doo | doo |
| 2 Feelah | tierla | song | song |
| 3 Sacpah | tarlee | tah | tah |
| 4 Narneec | teenar | neah | eh |
| 5 Sooloh | noono | moo | d'moo |
| 6 Soo dondo | dia goonoo | momadoo | neeroo |
| 7 Soo feelah | dia tierla | momasong | mesoong |
| 8 Soo sacpah | dia tarlee | mumatah | biah biah |
| 9 Soo narnee | dia teenar | munia sussahdoo | chieeroo |
| 10 Tang | zehiar | pouah | poh |

Thus the above characters of the Vahie Phonetic, might be arranged into a general African written language.

In concluding, I hope the missionaries or others may follow up what has been thus commenced, as, from the opposite nature of the duties of a naval officer, I could neither spare time, nor hope for the opportunity of faithfully arranging a grammar or making translations.

From the Admiralty my discovery was transmitted officially to the Royal Geographical Society.

Mr. Norris studied the language and published notes with a full alphabet, enlarging considerably on Mr. Koelle's and my researches. They will be found in the 20th Number of the Report of the Royal Geographical Society.

I was somewhat surprised, on my return to England, having given a vocabulary of the language and the characters alphabetically arranged to a German missionary and philologist at Sierra Leone, in finding that gentleman, after most spiritedly following up the discovery, had published a pamphlet, entitled "Narrative of an Expedition into the Vy Country of West Africa, and the Discovery of a System of Syllabic Writing, &c. By the Rev. J. W. Koelle, missionary," &c.; almost entirely forgetting the pioneer, leaving it a matter of doubt to the reader, to whom the credit of the discovery belonged.

There remains no doubt but that this language is purely an invention of late date, and one entirely of African enterprise. What the African intellect is capable of developing, may not be altogether known in this country. Education is doing much towards civilising Africa, and if used as a material organ will be a very strong one against the slave trade.

Among a people who, for convenience, can frame and establish a Phonetic language, and teach

from it unassisted (although in the neighbourhood of colonies of nations known to be patrons of literature), an extension of education must be of most material service.

There are several extraordinary instances of blacks becoming highly educated, and of the most eminent service to their fellow men: of these one of the most enterprising may be considered the Rev. Mr. C——, the senior missionary at Abeahkeutah, who has translated the Scriptures into the Yoribah language. This gentleman was originally a slave, and liberated from the slave-yard at Sierra Leone.

In the new presidency of Liberia are several instances of the capacity of the blacks' intellect.

Among the emigrants, or liberated Africans at Sierra Leone, the Akoos, natives from the Bight of Benin (so termed from the general salute, or "good morning," common to all the kingdoms of that portion, "Akoo Akoo"), are said to be the most apt at learning. They become, in love of money and ingenuity and tact at bargains, the Jews of Africa, when removed from their own country; though some (as, for instance, Don José Almeida, instanced in the foregoing Journals) take advantage of their education on their return to cheat their own people.

With such convincing proofs, let it be hoped

that education will be extended ; and wherever a black becomes distinguished for talent, such rewards should be open to him, in his own continent, as have lately been given to a reverend and learned black gentleman, the new consul of the negro republic of Liberia.

If the offices of the colony of Sierra Leone were more open to black enterprise, there would be a greater extension of competition ; and although the missionaries have many large schools, and the course of education is exceedingly good, the scholars would considerably increase in numbers, and no doubt many of them become also excellent missionaries and schoolmasters to return to their native country.

Slavery is the offspring of ignorance, and in no part of Africa where the light of civilisation has shone does slavery exist. In Dahomey the missionaries have not yet planted the tree of knowledge, although in each of the large neighbouring countries, Ashantee and Abeahkeutah (Yoribah), education is fast advancing, and the slave trade receding.

Trade and education generally in Africa advance with equal strides, treading down the slave traffic, and carrying with them all the advantages of civilisation over barbarism. In all the large rivers of the Bights of Benin and Biafra, the

slave trade has been almost entirely uprooted by the extension of palm-oil trade and increase of education, the kings of those rivers keeping their own ledgers, and attending materially to their trade affairs to such an extent as to have abolished the religious superstitions that in former years ruled the kings themselves: among these the “Egboh of the Camaroons” (a wild superstition that ruled all classes to such an extent that British captains of merchant vessels have bought Egboh, *i. e.* become votaries of this degrading, disgusting superstition, in order, in their position as priests, to command a monopoly over their more ignorant, but less to be pitied customers) has been entirely done away with.

C.

Vocabulary of the Dahoman Language.

THE language is of the poorest order of any I have met even in Africa, although in the vicinity of the most complete of African languages, the Haussa, in which the Arabic cipher is applied to

its intonation. This may be considered extraordinary to those unacquainted with the obscure origin of the Dahomans. I can make but the following few observations of the Dahoman manner of expression.

Many of the words are compounded, while other words are (altered in sound) pronounced with or without emphasis, according to the (or otherwise) superlative meaning required: thus, dag bee, good; dag bee, dag bee, means beautiful, sublime, purity, excellence, &c., according to its emphatic sound and the number of the repetitions.

The addition of the word "voo" to the name of an animal, signifies the offspring of that animal: thus, soh, a horse; soh *voo*, a colt;— koh *kroo*, a fowl; koh *kroo voo*, a chicken.

The addition of "pee vee," or small, is sufficient to express almost an entirely different meaning in our idiom: thus, toh, a city; toh *pee vee*, a village;— hoh, a house; hoh *pee vee*, a hut.

All foreign introductions are termed "ee a *voo*," or the white man's: thus, zah, a mat; ee a *voo zah*, a mattress;— zing *poo*, a stool; ee a *voo zing poo*, a chair. Any native who leaves his country, even as a slave, and returns, if he wears the dress of a foreigner, is termed ee a *voo*, a white man: thus, in Whydah, to distinguish two men named Das-

soo, one is termed for the above reason, Ee a voo Dassoo.

The numerals are very peculiarly compounded, as the following list will show.

NUMERALS.

1. Deh
2. Oui
3. Ahtor
4. Eh neh
5. Ah tong
6. Ah ee zae
7. Teghn oui
8. Tar tor
9. Teghn neh
10. Woh
11. Woh deh poh
12. Woh oui
13. Woh ator
14. Woh eh neh
15. Ah fau tong
16. Ah fau tong noo koo noo deh poh
17. Fau tong noo koo noo g'noui
18. Fau tong noo koo noo ah tong
19. Fau tong noo koo noo eh neh
20. Koh
21. Koh noo poo noo koo deh
30. Ek bagh
40. Kan dee
50. Kan dee woh
60. Kan dee koh
70. Kan dee ek bagh

NUMERALS — *continued.*

80. Kan oui
 90. Kan oui woho
 100. Kan oui koh

After ten to fifteen the translation would be ten + one, + two &c.: sixteen is a compound of ten, five, and one added, and so on to 20.

40. A contraction of twice twenty.
 50. Twice twenty and ten added.
 60. Twice twenty and twenty.
 70. Twice twenty and thirty added.
 80. Twice forty.
 90. Twice forty and ten added.
 100. Twice forty and twenty added.
